the New Paradigm Beyond Conventional Medicine Craig Bruner, 2013-06-11 In his book Reversing Chronic Lyme Disease Craig Bruner has written perhaps one of the most in depth intelligent and comprehensive books ever written on the subject of chronic Lyme disease Extremely powerful yet practical It addresses nearly every important level of the Lyme narrative A no holds barred and honest look at how the government and conventional medicine have not only failed the Lyme victim but by using their drug based model have actually prolonged the disease in the vast majority of chronic sufferers The

author lays out a new paradigm that he used himself to reverse and completely heal his long entrenched chronic Lyme disease almost exclusively without the use of drugs This book puts the power of healing squarely back in the hands of the Lyme victim and provides an intelligent road map that can be custom designed to help reverse Lyme disease even in the most resistant of sufferers This is a monumental work and represents the culmination of over 6 years of research Seldom has the subject of Lyme disease been studied written about and presented on such a level It will open your eyes with an in depth look at not just Lyme disease but the chronic form which other authors seldom even discuss let alone present why it happens Additionally Craig Bruner shares therapies based upon the findings of research primarily targeted towards reversing chronic Lyme disease many of which have never been presented in any other book Certainly most doctors are not even aware of this information This book may make most others obsolete Get ready to be overwhelmed by the thorough manner in which the topic of chronic Lyme disease has been explored and many of the newer strategies that can be employed which have brought healing beyond expectation Be warned this is powerful information that can offer the sufferer new hope that he she can experience a deeper level of healing

Healing beyond the Body Larry Dossey, 2003-02-11 Does the mind produce consciousness or transmit it Can machines detect love Why has job stress become a worldwide epidemic Why do objects sometimes seem to have minds of their own Could war be a biological condition Dr Larry Dossey one of the most influential spokespersons for the role of consciousness and spirituality in medicine tackles all these questions and more with clarity and wit In this book he explores the relationship often documented in extensive research between science and unscientific topics such as prayer love laughter war creativity dreams and immortality

Crossings Jon Kerstetter, 2017 In Iraq as a medic and officer Jon Kerstetter balanced two impossibly conflicting imperatives to heal and to kill When he suffered an injury and then a stroke during his third tour he wound up back home in Iowa no longer able to be either a doctor or a soldier In this gorgeous memoir that moves from his impoverished upbringing on an Oneida reservation to his harrowing stints as a volunteer medic in Kosovo and Bosnia through the madness of Iraq and his intense mandate to assemble a team to identify the remains of Uday and Qusay Hussein and the struggle afterward to come to terms with a life irrevocably changed Kerstetter beautifully illuminates war and survival the fragility of the human body and the strength of will that lies within

Beyond Complementary Medicine Michael H. Cohen, 2000 Explores the web of legal ethical and regulatory issues surrounding the integration of complementary and alternative medicine into clinical care

Crucial Event Rehabilitation Therapy Bruce J. West, Paolo Grigolini, Mauro Bologna, 2023-11-30 This book describes a new strategy for rehabilitation from injury and or disease using Crucial Event Therapy Recent studies

have shown that individuals can recuperate more rapidly from surgery and other invasive procedures intended to correct the negative effects of disease or injury through the use of life support systems that operate at the body's natural biofrequencies. The same observation has been clinically shown to reverse the degenerative effects of neurodegenerative diseases such as Parkinson's and Alzheimer's Disease. Crucial Event Therapy describes medicine as the operational control of the functions of the human body treated as a network of networks with 1 f variable crucial events coding the dynamic states of health and disease through information flow within a network and information exchange between biomedical networks. A new way of thinking based on the statistics of Cortical Events is presented and the relevant literature is suitably referenced. This is an ideal book for biophysicists and data scientists seeking to understand the connection of complexity measures for the study of consciousness with the clinical aspects of designing a rehabilitation strategy.
