Sustainability Beyond Technology Pasi Heikkurinen, Toni Ruuska, 2021-03-29 Current debates on sustainability are largely building on a problematic assumption that increasing technology use and advancement are a desired phenomenon creating positive change in human organizations This kind of techno optimism prevails particularly in the discourses of ecological modernization and green growth as well as in the attempts to design sustainable modes of production and consumption within growth driven capitalism This transdisciplinary book investigates the philosophical underpinnings of technology presents a culturally sensitive critique to technology and outlines feasible alternatives for sustainability beyond technology It draws on a variety of scholarly disciplines including the humanities philosophy and environmental history social sciences ecological economics political economy and ecology and natural sciences geology and thermodynamics to contribute to sustainability theory and policy By examining the conflicts and contradictions between technology and sustainability in human organization the book develops a novel way to conceptualize confront and change technology in modern society

Beyond Tech Fixes Christo El Morr, Yahya El-Lahib, Rachel da Silveria Gorma, 2025-09-30 This book offers a bold and critical examination of the intersections between artificial intelligence AI and disability justice Rather than framing AI as a neutral or purely beneficial tool the book interrogates how AI systems reproduce ableism deepen systemic exclusions and perpetuate colonial neoliberal and corporate power structures It challenges the prevailing reliance on tech fixes improving datasets or tweaking algorithms and instead insists on addressing the deeper social political and ethical dimensions of AI development and deployment Through a disability justice lens it highlights the complex realities faced by disabled communities and emphasizes the need for approaches that dismantle ableism rather than superficially enhance accessibility Covering topics such as algorithmic bias data colonialism technoableism and the militarization of AI this book foregrounds critical frameworks including design justice data sovereignty and participatory governance It draws on diverse scholarly perspectives and activist insights to propose actionable pathways toward more accountable equitable and inclusive AI futures By centering disabled people's experiences and knowledge the book offers not only critique but also visionary strategies for transforming AI systems to serve justice rather than entrench oppression

Beyond Technology David Buckingham, 2013-04-17 Beyond Technology offers a challenging new analysis of learning young people and digital media Disputing both utopian fantasies about the transformation of education and exaggerated fears about the corruption of childhood innocence it offers a level headed analysis of the impact of these new media on learning drawing on a wide range of critical research Buckingham argues that there is now a growing divide between the media rich world of childrens lives outside school and their experiences of technology in the classroom Bridging this divide he suggests will require more than

superficial attempts to import technology into schools or to combine education with digital entertainment While debunking such fantasies of technological change Buckingham also provides a constructive alternative arguing that young people need to be equipped with a new form of digital literacy that is both critical and creative Beyond Technology will be essential reading for all students of the media or education as well as for teachers and other education professionals **Beyond Silicon** Barrett Williams, ChatGPT, 2025-06-26 Beyond Silicon A Journey into the Future of Electronics Step into the future of electronics with Beyond Silicon a groundbreaking exploration beyond the confines of traditional silicon based technology This compelling eBook delves deep into the heart of innovation unlocking the transformative power of materials at the forefront of the next tech revolution Unravel the Mysteries of Graphene and More Discover the astonishing potential of graphene an extraordinary material poised to revolutionize the industry with its superior conductivity and strength Learn how graphene transistors are redefining possibilities in electronics and explore the groundbreaking applications that are already changing the world Explore the Cutting Edge World of Two Dimensional Materials From transition metal dichalcogenides to borophene this eBook goes beyond the status quo introducing you to a universe of two dimensional materials that offer advantages over traditional silicon Uncover the practical challenges and triumphs in their production and application and see why the world is so excited about what lies beyond the silicon valley Dive into the Future with Spintronics and Organic Semiconductors Venture into the realm of spintronics where electron spin not just charge drives the next wave of technological breakthroughs Coupled with the allure of organic semiconductors which promise flexibility and innovation in wearable tech this eBook charts a course toward a dynamic and adaptable future Harness the Power of Photonic and Quantum Advancements Navigate the light speed transformation enabled by photonic materials and optical transistors Grasp the potential of quantum dots and nanowires to shatter conventional computing limitations leading us into an era where speed and efficiency reign supreme A Visionary Guide for Aspiring Innovators Beyond Silicon doesn't just stop at exploration it prepares you for the transitions ahead With considerations of environmental impact and ethical manufacturing this insightful text paves the way for responsible and revolutionary advancements Embark on an illuminating journey that unveils the future of electronics and equips you with the insights to thrive in a post silicon world The path to tomorrow starts here

Congressional Symposium, Railroads--1977 and Beyond, Problems and Promises, 1978 Beyond the Valley Ramesh Srinivasan, 2020-09-01 How to repair the disconnect between designers and users producers and consumers and tech elites and the rest of us toward a more democratic internet In this provocative book Ramesh Srinivasan describes the internet as both an enabler of frictionless efficiency and a dirty tangle of politics economics and other inefficient inharmonious human activities We may love the immediacy of Google search results the convenience of buying from Amazon and the elegance and power of our Apple devices but it's a one way top down process We're not asked for our input or our opinions only for our data The internet is brought to us by wealthy technologists in Silicon Valley and China It's time Srinivasan argues that we

think in terms beyond the Valley Srinivasan focuses on the disconnection he sees between designers and users producers and consumers and tech elites and the rest of us The recent Cambridge Analytica and Russian misinformation scandals exemplify the imbalance of a digital world that puts profits before inclusivity and democracy In search of a more democratic internet Srinivasan takes us to the mountains of Oaxaca East and West Africa China Scandinavia North America and elsewhere visiting the design labs of rural low income and indigenous people around the world He talks to a range of high profile public figures including Elizabeth Warren David Axelrod Eric Holder Noam Chomsky Lawrence Lessig and the founders of Reddit as well as community organizers labor leaders and human rights activists To make a better internet Srinivasan says we need a new ethic of diversity openness and inclusivity empowering those now excluded from decisions about how technologies are designed who profits from them and who are surveilled and exploited by them
