Biology If8765 Human Reproduction:

Human Reproduction Casey Rand, 2009 Human Reproduction is an amazing process Learn the physical changes that occur in humans to ready their bodies with the equipment needed to reproduce This book explains these changes and also explores what happens during conception pregnancy and the delivery of a new baby What are genes and DNA Why is every person unique The answers might surprise you Sci Hi is an engaging comprehensive and visually stimulating series that takes learning science core curriculum to a whole new level The Reproductive System Randolph W. Krohmer, 2009 Organisms reproduce to ensure the continued survival of their respective species For humans our ability to produce offspring and contribute to genetic variability in the world is made possible by our body's reproductive system *Human Reproductive Biology* Richard E. Jones, Kristin H. Lopez, 2013-09-28 The fourth edition of Human Reproductive Biology winner of a 2015 Textbook Excellence Award Texty from The Text and Academic Authors Association emphasizes the biological and biomedical aspects of human reproduction explains advances in reproductive science and discusses the choices and concerns of today Generously illustrated in full color the text provides current information about human reproductive anatomy and physiology This expansive text covers the full range of topics in human reproduction from the biology of male and female systems to conception pregnancy labor and birth It goes on to cover issues in fertility and its control population growth and family planning induced abortion and sexually transmitted diseases This is the ideal book for courses on human reproductive biology with chapter introductions sidebars on related topics chapter summaries and suggestions for further reading Winner of a 2015 Texty Award from the Text and Academic Authors Association Beautifully redrawn full color illustrations complement completely updated material with the latest research results and clear logical presentation of topics Covers the basic science of reproduction endocrinology anatomy physiology development function and senescence of the reproductive system as well as applied aspects including contraception infertility and diseases of the reproductive system New companion website features full color illustrations as PowerPoint and jpeg files for both professors and students to use for study and presentations *On Fertile Ground* Peter Thorpe ELLISON, Peter Thorpe Ellison, 2009-06-30 Reproduction is among the most basic of human biological functions both for our distant ancestors and for ourselves whether we live on the plains of Africa or in North American suburbs Our reproductive biology unites us as a species but it has also been an important engine of our evolution In the way our bodies function today we can see both the imprint of our formative past and implications for our future It is the infinitely subtle and endlessly dramatic story of human reproduction and its evolutionary context that Peter T Ellison tells in *On Fertile Ground* Ranging from the latest achievements of modern fertility clinics to the lives of subsistence farmers in the rain forests of Africa this book offers both a remarkably broad and a minutely detailed exploration of human reproduction Ellison a leading pioneer in the field combines the perspectives of anthropology stressing the range and variation of human experience ecology sensitive to the two way interactions between humans and their environments

and evolutionary biology emphasizing a functional understanding of human reproductive biology and its role in our evolutionary history Whether contrasting female athletes missing their periods and male athletes using anabolic steroids with Polish farm women and hunter gatherers in Paraguay or exploring the intricate choreography of an implanting embryo or of a nursing mother and her child *On Fertile Ground* advances a rich and deeply satisfying explanation of the mechanisms by which we reproduce and the evolutionary forces behind their design **Human Reproductive Biology** Mark M.

Jones,2012-12-02 *Human Reproductive Biology* focuses on the processes concerns and trends in human reproduction Divided into four parts with 19 chapters the book starts by tracing the history of human reproduction biology and the questions and choices involved The first part focuses on the male and female reproductive systems The text notes the different organs involved in reproduction including the penis scrotum vagina oviducts and mammary glands The book discusses sexual development and differentiation particularly noting the variance of sex ducts and glands external genitalia and disorders of sexual development and determination The text also looks at puberty Concerns include gonadal changes from birth to puberty mechanisms that influence puberty and puberty and psychosocial adjustment The second part deals with menstrual cycle fertilization pregnancy labor and birth Some of the concerns include length of menstrual cycle absence of menstruation transport of sperm and ovum in the oviduct and semen release The text also highlights labor and birthing processes as well as the relationship of neonates and parents The third part looks at the medical aspects of human reproduction infertility and sexually transmitted diseases Concerns include contraception abortion herpes genitalis and vaginitis The text folds with discussions on human sexual behavior population growth and family planning Concerns include sexual dysfunction the effects of overpopulation and population control The book is a vital source of data for readers interested in human reproduction

Human Reproduction J. I. D. Sadow,1980 **Problems of Human Reproduction** Paul Popenoe,1926 **Human Reproduction and Developmental Biology** David J. Begley,J. A. Firth,J. R. S. Hoult,1980 *Human Reproduction* L. M. Baggott,1997-02-20 Concise introductory textbook examining human reproduction for advanced school and beginning university students *Dynamics of Human Reproduction* James W. Wood,2017-09-29 Awarded the W W Howells Award for the Outstanding Book in Biological Anthropology this volume presents a comprehensive integrated and up to date overview of the major physiological and behavioral factors affecting human reproduction In attempting to identify the most important causes of variation in fertility within and among human populations Wood summarizes data from a wide range of societies Trained as an anthropologist as well as a demographer he devotes special attention to so called natural fertility populations in which modern contraceptives and induced abortion are not used to limit reproductive output Such an emphasis enables him to study the interaction of biology and behavior with particular clarity The volume weaves together the physiological demographic and biometric approaches to human fertility in a way that will encourage future interdisciplinary research Instead of offering a general overview the focus is to answer one question Why does fertility and the number of live births

vary from couple to couple within any particular population and from population to population across the human species as a whole Topics covered include ovarian function conception and pregnancy intrauterine mortality reproductive maturation and senescence coital frequency and the waiting time to conception marriage patterns and the initiation of reproduction the fertility reducing effects of breastfeeding the impact of maternal nutrition on reproduction and reproductive seasonality This unique combination of comprehensive subject matter and an integrated analytical approach makes the book ideally suited both as a graduate level textbook and as a reference work
