

Biology Education Pre Final Exam Questions Feb, March 2024

1. Explain the difference between a primary consumer and a secondary consumer. Give an example of each.
Primary consumers are organisms that eat producers (plants). Secondary consumers are organisms that eat primary consumers.
Example: A rabbit is a primary consumer. A fox is a secondary consumer.

2. What is the difference between a producer and a consumer?

Producers are organisms that make their own food (e.g., plants). Consumers are organisms that eat other organisms for energy.
Producers are autotrophs. Consumers are heterotrophs.
Producers are the base of the food chain. Consumers are the rest of the food chain.
Producers are the only organisms that can make their own food.
Producers are the only organisms that can convert light energy into chemical energy.

3. Explain the difference between a herbivore and a carnivore. Give an example of each.
Herbivores are organisms that eat only plants. Carnivores are organisms that eat only other animals.
Example: A rabbit is a herbivore. A fox is a carnivore.
Herbivores are primary consumers. Carnivores are secondary consumers.
Herbivores are the base of the food chain. Carnivores are the rest of the food chain.
Herbivores are the only organisms that can make their own food.
Herbivores are the only organisms that can convert light energy into chemical energy.

Lovejoy's College Guide, 1991 Offers in depth profiles of more than 2500 four year and two year colleges and universities [Complete Guide to American Colleges and Universities](#), 1983 *Resources in education*, 1991

Educational Practices in China, Korea, and the United States Chuang Wang, Lan Kolano, Do-Hong Kim, 2020-03-01 This book is written by a diverse cohort of both of American educators including professors teachers school counselors and school administrators from pre K to college levels Most of the contributors come from disciplinary areas of English as a

second language and school administration With the pressure of Common Core State Standards Initiative American educators are now shifting their focus to standards based instruction Meanwhile Chinese educators are moving away from national standards and developing state level curriculum and instruction to meet specific needs of the students in local provinces There is also a debate about whether or not to use the National College Entrance Examination as the only test for college admission Some provinces e g Zhejiang and Hubei are administering their own college entrance examinations The book outlines the sociocultural roots of education in the three countries linking the tradition and philosophical orientations to each country s own history of education Furthermore the book compares and contrasts the curriculum especially the teaching of English as a second foreign language in three countries This book examines the stress of students physical education various pedagogical styles in foreign language education as well as instructional texts and cross cultural dialogue between teachers Additionally the book explores factors that influence parent s involvement and women s educational and career aspirations Lastly the book presents modern technologies such as smart learning technologies and online learning platforms not only to facilitate future educational systems but also to promote international exchanges The chapters of the book are thematically diverse but they help to provide inspirations for educators both in American and Asian countries The findings offer alternative practical lenses for educational community to seek for some middle ground between Chinese South Korea and American education The intended audience for this book is graduate students teachers administrators and professionals in education

Chinese Science Education in the 21st Century: Policy, Practice, and Research Ling L. Liang,Xiufeng Liu,Gavin W. Fulmer,2016-08-16 This book provides an overview of science education policies research and practices in mainland China with specific examples of the most recent developments in these areas It presents an insiders report on the status of Chinese science education written primarily by native speakers with first hand experiences inside the country In addition the book features multiple sectional commentaries by experts in the field that further connect these stories to the existing science education literature outside of China This book informs the international community about the current status of Chinese science education reforms It helps readers understand one of the largest science education systems in the world which includes according to the Programme for International Student Assessment the best performing economy in the world in science math and reading Shanghai China Readers gain insight into how science education in the rest of China compares to that in Shanghai the ways Chinese science educators teachers and students achieve what has been accomplished what Chinese students and teachers actually do inside their classrooms what educational policies have been helpful in promoting student learning what lessons can be shared within the international science education community and much more This book appeals to science education researchers comparative education researchers science educators graduate students state science education leaders and officers in the international communities It also helps Chinese students and faculty of science education discover effective ways to share their science education stories with the rest of the
