Book And Motivation Cognitive Control Frontiers Psychology:

Motivation and Cognitive Control Todd S. Braver, 2015-12-22 Individuals do not always perform to their full capability on cognitive tasks. When this occurs, the usual explanation is that the individual was not properly motivated. But this begs the important question: How and why does motivation interact with and influence cognitive processing and the control processes that regulate it? What are the underlying mechanisms that govern such interactions? Motivation has been an important component of psychology and neuroscience throughout the history of the field but has recently been rejuvenated by rapidly accelerating research interest in the nature of motivation-cognition interactions, particularly as they impact control processes and goal-directed behavior. This volume provides an up-to-date snapshot of the state of research in this exciting, expanding area. The contributors to the volume are internationally renowned researchers that lead the field in conducting groundbreaking studies. Moreover, they represent a variety of research perspectives and traditions: cognitive psychology and neuroscience, animal learning, social affective and personality psychology, and development, lifespan and aging studies. This book summarizes our current state of understanding of the relationship between motivation and cognitive control and serves as an essential reference for both students and researchers.

International Handbook of Psychology Learning and Teaching Joerg Zumbach, Douglas A. Bernstein, Susanne Narciss, Giuseppina Marsico, 2022-12-16 The International Handbook of Psychology Learning and Teaching is a reference work for psychology learning and teaching worldwide that takes a multifaceted approach and includes national, international, and intercultural perspectives. Whether readers are interested in the basics of how and what to teach in training psychology teachers, in taking steps to improve their own teaching, or in planning or implementing research on psychology learning and teaching, this handbook will provide an excellent place to start. Chapters address ideas, issues, and innovations in the teaching of all psychology courses, whether offered in psychology programs or as part of curricula in other disciplines. The book also presents reviews of relevant literature and best practices related to everything from the basics of course organization to the use of teaching technology. Three major sections, consisting of several chapters each, address Teaching Psychology in Tertiary Higher Education, Psychology Learning and Teaching for All Audiences, and General Educational and Instructional Approaches to Psychology Learning and Teaching.

Dual Process Theory 2.0 Wim De Neys, 2017-11-09 Dual Process Theory 2.0 provides a comprehensive overview of the new directions in which dual process research is heading. Human thinking is often characterized as an interplay between intuition and deliberation, and this two-headed dual process view of human thinking has been very influential in the cognitive sciences and popular media. However, despite the popularity of the dual process framework, it faces multiple challenges. Recent advances indicate that there is a strong need to re-think some of the fundamental assumptions of the original dual process model. With chapters written by leading scholars who have been actively involved in the development of an upgraded Dual Process Theory 2.0, this edited volume presents an accessible overview of the latest empirical findings and theoretical

ideas With cutting edge insights on the interaction between intuition and deliberation Dual Process Theory 2.0 should be of interest to psychologists philosophers and economists who are using dual process models Motivation and Action Jutta Heckhausen, 2025-09-30 This fourth edition provides translations of all chapters of the most recent sixth German edition of Motivation and Action including one entirely new chapter This volume provides comprehensive coverage of the history of motivation and introduces up to date theories and new research findings Early sections offer a broad introduction to and deep understanding of the field of motivation psychology mapping out different perspectives and research traditions Subsequent chapters examine major themes of human motivation including achievement affiliation and power motivation as well as the fundamentals of motivation psychology such as motivated and goal oriented behaviors implicit and explicit motives and the regulation of development In addition the book discusses the roles of motivation in three practical fields school and college the workplace and sports Topics featured in this text include Dynamic between person and situation in motivating behavior Conscious and unconscious motivators of behavior Drives and incentives in the fields of achievement intimacy sociability and power How the biochemistry and structures of our brain shapes motivated behavior How to engage in intentional goal directed behavior The potential and limits of motivation and self direction in shaping our lives Motivation and Action Fourth Edition is a must have resource for undergraduate and graduate students as well as researchers in the fields of motivation psychology cognitive psychology and social psychology as well as personality psychology and agency

Neuroeconomics, Judgment, and Decision Making Evan A. Wilhelms, Valerie F.
