Adaptive Behavior Checklist Manual:

Handbook of Assessment in Childhood Psychopathology Cynthia L. Frame, Johnny L. Matson, 2013-11-21 One of the most important practical problems in child psychology and psychiatry is the differential diagnosis of emotional disorders. Until recently the general mode of assessment had been to apply to children the characteristics of psychopathology that were evident in adults. In addition there had been few assessment tools available for use with children aside from modified versions of adult instruments. Understandably this approach was controversial and dissatisfaction with it led to the more recent knowledge that adult and child problems may be manifested quite differently. The third edition of the Diagnostic and Statistical Manual of Mental Disorders takes these factors into account much more extensively than previous editions. Furthermore a great deal of research on methodology in child assessment procedures has emerged recently. Yet in spite of these advances practicing clinicians are still frequently at a loss in moving from the characteristics of the disturbed child before them to the final assignment of a psychiatric diagnosis. The focus of this book is to outline the various methods of viewing and categorizing the wide range of childhood psychopathology with special emphasis on the end product of making a differential diagnosis. Our goal was to make this book unique in several ways. First we attempted to cover a wider range of disorders than is typical in currently available handbooks. **Adaptive Behavior** W. Alan Coulter, Henry W. Morrow, 1978
