Additive Migration From Plastics Into Foods:

Additive Migration from Plastics Into Food T. R. Crompton, 2013-10-22 Additive Migration from Plastics Into Food examines the intrusion of foreign chemicals into food via additives present in plastics packaging and the toxic hazards they pose to consumers This book shows how direct contact between the packed commodity and the plastic is likely to result in the transfer of polymer additives adventitious impurities such as monomers catalyst remnants and residual polymerization solvents and low molecular weight polymer fractions from the plastic into the packaged material This book is comprised of nine chapters and begins with a discussion on the various types of plastics used in food packaging as well as the types of substances present in the plastic that might migrate into the food Subsequent chapters review world literature on extraction testing and the analysis of extractants The determination of various types of polymer additives and residual monomers in extractants of liquid foodstuffs and beverages solid foods edible oils and fatty foodstuffs is considered The final chapter looks at the legal requirements concerning the use of additives in food grade plastics in various countries This monograph will be of interest to those in the plastics industry food and beverage packaging industry and large retail outlets such as supermarkets along with medical and public health officials legislators environmentalists and the general public *Additive Migration from Plastics Into Foods* Thomas Roy Crompton, 2007 Plastics are now being used on a large scale for the packaging of fatty and aqueous foodstuffs and beverages both alcoholic and non alcoholic Thus it is likely that some transfer of polymer additives will occur adventitious impurities such as monomers oligomers catalyst remnants and residual polymerisation solvents and low molecular weight polymer fractions from the plastic into the packaged material with the consequent risk of a toxic hazard to the consumer This book covers all aspects of the migration of additives into food and gives detailed information on the analytical determination of the additives in various plastics This book will be of interest to those engaged in the implementation of packaging legislation including management analytical chemists and the manufacturers of foods beverages pharmaceuticals and cosmetics and also scientific and toxicologists in the packaging industry *Additive Migration from Plastics Into Food* Thomas Roy Crompton, 1979 Types of polymers used in food packaging Non plastics components of plastics Principles of extractability testing of plastics Determination of additives in aqueous alcoholic and simple hydrocarbon extractants Determination of specific types of additives in aqueous and alcoholic extractants Determination of additives in edible oils and fatty foodstuffs extractants Determination of additives and their degradation products in aqueous and in simple hydrocarbon extractants Determination of antioxidants in foods Legislative aspects of the use of additives in food grade plastics *Additive Migration from Plastics into Food* Crompton TR., 1979

Regulation of Food Packaging in Europe and the USA Derek J Knight, Lesley A Creighton, 2004 Annotation A wide variety of plastics are used in food contact applications and it is important that such plastics do not affect the food with which they come into contact The objective of food packaging legislation is to protect the consumer by controlling the

contamination of food by chemicals transferred from the packaging Food packaging regulations are constantly under revision and differ significantly between Europe and the USA This report provides a clearly written summary of the current legislation surrounding the use of plastics in contact with food It discusses the plastics used in food packaging their characteristics and applications This review is accompanied by around 400 abstracts from papers and books in the Rapra Polymer Library database
