Explain how compartmentalization of cells relates to the complexity of an organism

Compartmentalization within Eukaryotic cells - Specific cell types for different jobs occur because **cells can tailor their internal make-up** to allow them to perform certain functions at high efficiency

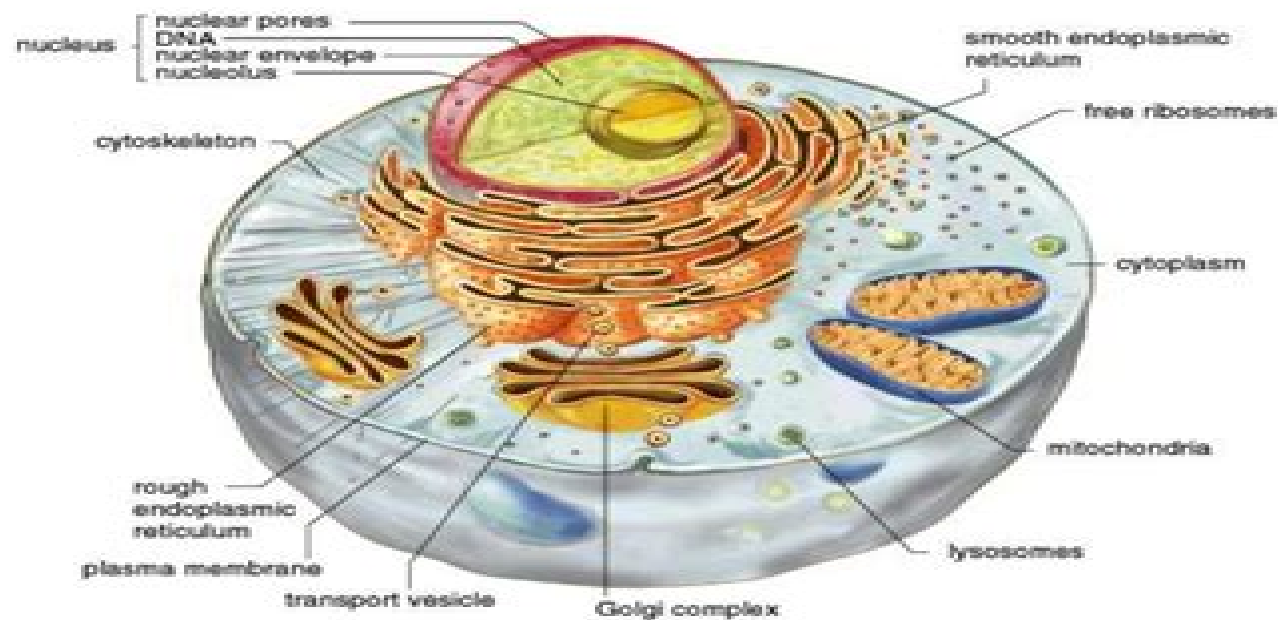

Complexity of multicellular organisms is due to the organization of specialized **organs**

Each organ is made up of specific **tissues**.

- made up of individual cells

Cells in tissues are specifically designed to perform different tasks

Draw and label the components of a typical cell, including the organelles.
