International Conference on Applied Technologies Miguel Botto-Tobar, Lohana Lema Moreta, Marcelo Zambrano Vizuete, Sergio Montes León, Pablo Torres-Carrion, Benjamin Durakovic, 2025-05-13 This book constitutes the refereed proceedings of the 6th International Conference on Applied Technologies ICAT 2024 held in Samborombon, Argentina during November 20-22, 2024. The 25 full papers included in this book were carefully reviewed and selected from 95 submissions. They were organized in topical sections as follows: Computing, E-learning, Electronics Technology Trends, Intelligent Systems, Machine Vision, and AT for Engineering Applications. Comprehensive Materials Processing, 2014-04-07 Comprehensive Materials Processing Thirteen Volume Set provides students and professionals with a one-stop resource consolidating and enhancing the literature of the materials processing and manufacturing universe. It provides authoritative analysis of all processes, technologies, and techniques for converting industrial materials from a raw state into finished parts or products. Assisting scientists and engineers in the selection, design, and use of materials, whether in the lab or in industry, it matches the adaptive complexity of emergent materials and processing technologies. Extensive traditional article-level academic discussion of core theories and applications is supplemented by applied case studies and advanced multimedia features. Coverage encompasses the general categories of solidification, powder deposition, and deformation processing and includes discussion on plant and tool design, analysis, and characterization of processing techniques, high-temperature studies, and the influence of process scale on component characteristics and behavior. Authored and reviewed by world-class academic and industrial specialists in each subject field. Practical tools such as integrated case studies, user-defined process schemata, and multimedia modeling and functionality maximize research efficiency by collating the most important and established information in one place, with integrated applets linking to relevant outside sources. *Advances in Electronic Engineering, Communication and Management Vol.1* David Jin, Sally Lin, 2012-01-24 This volume presents the main results of the 2011 International Conference on Electronic Engineering, Communication and Management (EECM2011) held December 24-25, 2011, Beijing, China. The EECM2011 is an integrated conference providing a valuable opportunity for researchers, scholars, and scientists to exchange their ideas face-to-face together. The main focus of the EECM 2011 and the present 2 volumes, *Advances in Electronic Engineering, Communication and Management*, is on Power Engineering, Electrical Engineering Applications, Electrical Machines, as well as Communication and Information Systems Engineering. *The Research of Data Transmission Technology in Measurement While Drilling* Jian Wang, Hanyun Wen, 2018-08-06 This book systematically discusses the data transmission modes, implementation principles, and simulation and field test of Measurement While Drilling communication system and its application at home and abroad. The advantages and disadvantages of different transmission modes and the limitations in application are analyzed, followed by the outlook for data transmission technology of MWD and its future direction and development trend. The main contents of

this book include an introduction to the data transmission technology in MWD the data transmission techniques in cable drilled logging especially the application and tests of OFDM orthogonal frequency division multiplexing in cable logging the mud pulse transmission technology in drilled logging with emphasis on the theoretical derivation and experimental scheme of the continuous waves transmission an encoding method of MWD data based on the mud pulse transmission and compression perception the theoretical derivation and experimental scheme of data transmission by electromagnetic waves in MWD especially eliminating interference signal algorithm of EM MWD the theoretical analysis and practical application of acoustic transmission of data in drilling with emphasis on the acoustic NC OFDM transmission This book pays attention to the combination of theory and practice containing both the derivation of theoretical formulas and the results of simulation and field tests It can be used as a reference book for MWD researchers and people interested in this field
