Adaptive management of renewable resources Carl J. Walters, 1986 **Adaptive Management of Social-Ecological Systems** Craig R. Allen, Ahjond S. Garmestani, 2015-04-25 Adaptive management is an approach to managing social ecological systems that fosters learning about the systems being managed and remains at the forefront of environmental management nearly 40 years after its original conception Adaptive management persists because it allows action despite uncertainty and uncertainty is reduced when learning occurs during the management process Often termed learning by doing the allure of this management approach has entrenched the concept widely in agency direction and statutory mandates across the globe This exceptional volume is a collection of essays on the past present and future of adaptive management written by prominent authors with long experience in developing implementing and assessing adaptive management Moving forward the book provides policymakers managers and scientists a powerful tool for managing for resilience in the face of uncertainty **Adaptive Management of Renewable Resources with Uncertain Dynamics**

Anthony David Miln Smith, 1979 **Adaptive Management of Renewable Resources with Uncertain Dynamics [microform]** Anthony David Miln Smith, 1981 **Agricultural Land Use and Natural Gas Extraction Conflicts**

Madeline Taylor, Tina Hunter, 2018-11-02 Onshore unconventional gas operations in most jurisdictions operate on the legal principle that all activities during exploration and extraction are temporary in nature The concept that the onshore unconventional gas industry has a temporary effect on the land on which it operates creates a regulatory paradox On one hand unconventional gas activities create energy security national wealth and a burgeoning export industry On the other agricultural land and agriculturalists may be significantly disadvantaged by unconventional gas activities potentially producing permanent damage to non renewable fertile soils and spoiling the underground water tables Thus threatening future food security and food sovereignty This book explores the socio regulatory dimensions of coexistence between agricultural and onshore unconventional gas land uses in the jurisdictions with the highest concentration of proven unconventional gas reserves Australia Canada the USA the UK France Poland and China In exploring the differing regulatory standpoints of unconventional gas land uses on productive farming land in the chosen jurisdictions this book provides an original three part categorisation of regulatory approaches addressing the coexistence of agricultural land and unconventional gas namely adaptive management precautionary and finally statism It offers a timely and topical approach to socio legal natural resource governance theory based on the participation transparency and empowerment for agricultural landholders examining how differing frameworks such as the collective bargaining framework can create equitable and

sustainable contractual arrangements with unconventional gas companies *The Adaptiveness of IWRM* Jos G. Timmerman, Claudia Pahl-Wostl, Jorn Moltgen, 2008-04-14 The Adaptiveness of IWRM provides new insights and knowledge on the challenges and solutions that current water management faces in a situation of complexity and uncertainty Drawing on the available results from a wide range of European research projects under several framework programmes the book provides an overview of the state of the art in European research on Integrated Water Resources Management on the topics of Participation Transboundary regimes Economics Vulnerability Climate change Advanced monitoring Spatial planning and the Social dimensions of water management The achievements of EU research projects are considered in view of the extent to which IWRM responds to the current complexity and uncertainty water management is facing These achievements are positioned in a wider context of worldwide developments in the respective topics which account for the future challenges From this the book concludes with the required focus of European research in the near future and promotes the concept of Adaptive Water Management as the preferred direction for the development of IWRM The book presents the achievements of European IWRM research on a range of water management topics and offers conclusions and recommendations for research foci that will be invaluable to water managers policy makers and academic researchers working in the field of IWRM
