And Competency Based Education Aviation Exploring Alternate:

Competency-Based Education in Aviation Suzanne K. Kearns, Timothy J. Mavin, Steven Hodge, 2017-05-15 Whether a trainee is studying air traffic control piloting maintenance engineering or cabin crew they must complete a set number of training hours before being licensed or certified The aviation industry is moving away from an hours based to a competency based training system Within this approach training is complete when a learner can demonstrate competent performance Training based on competency is an increasingly popular approach in aviation It allows for an alternate means of compliance with international regulations which can result in shorter and more efficient training programs However there are also challenges with a competency based approach The definition of competency based education can be confusing training can be reductionist and artificially simplistic professional interpretation of written competencies can vary between individuals and this approach can have a high administrative and regulatory burden *Competency Based Education in Aviation Exploring Alternate Training Pathways* explores this approach to training in great detail considering the four aviation professional groups of air traffic control pilots maintenance engineers and cabin crew Aviation training experts were interviewed and have contributed professional insights along with personal stories and anecdotes associated with competency based approaches in their fields Research based and practical strategies for the effective creation delivery and assessment of competency based education are described in detail *Implementing Competency-Based Training and Assessment in Aviation* Norman MacLeod, 2025-09-24 *Implementing Competency Based Training and Assessment in Aviation* explains in detail with examples how to implement Competency Based Training and Assessment in aviation It describes how to develop competence models assess workplace competence and understand the role of competence models in recruitment and selection Taking the framework published by ICAO this book breaks it down into its component parts and explains how to identify the changes in behaviour needed to enable individuals to act safely and efficiently in hazardous environments It outlines the framework that underpins training intervention design and investigates tactics of intervention based on current evidence around efficacy This book acts as a guide to constructing classroom activities that serve as vehicles for addressing the link between declarative and process knowledge under controlled conditions Airline personnel pilots and aviation industry professionals involved in performance assessments and training will benefit from this book **Engaging the Next Generation of Aviation Professionals** Suzanne K. Kearns, Timothy J. Mavin, Steven Hodge, 2019-11-08 *Engaging the Next Generation of Aviation Professionals* is an edited volume that brings together a diverse set of academic and professional perspectives within the three themes of attracting educating and retaining the next generation of aviation professionals NGAP This compilation is the first academic work specifically targeting this critical issue The book presents a rich variety of perspectives academic philosophies and real world examples Submissions include brief case studies longer scholarly works from respected academics and professional reflections from individuals who have made important contributions to their field

The book includes academic chapters that explore the topic from a more theoretical standpoint yet are accessible and understandable to a professional audience. These are complemented by both broad and specific practice examples that describe initiatives and applications occurring in the industry around the three themes. All submissions include descriptive insights, experiences, and first-hand accounts of accomplishments intended to support the work of other professionals managing NGAP issues. This work will be valuable to anyone involved in attracting, educating, or retaining NGAP, including academics, operators, national and international regulators, and outreach coordinators among many others.

Engineering Psychology and Cognitive Ergonomics Don Harris, Wen-Chin Li, 2025-05-29. This two-volume set constitutes the thoroughly refereed proceedings of the 22nd International Conference on Engineering Psychology and Cognitive Ergonomics (EPCE 2025) held as part of HCI International 2025 held in Gothenburg, Sweden, during June 22-27, 2025. Two volumes of the HCII 2025 proceedings are dedicated to this year's edition of the EPCE conference. The first volume centers around a diverse array of interconnected themes related to human performance, workload, and situational awareness in the use of complex interactive applications and environments, as well as the role of cognitive psychology on designing and evaluating interactive systems and investigating computer-supported collaboration and teaming. The second volume focuses on issues related to Cognitive Psychology in the demanding contexts of aviation and space.

Adaptive Instructional Systems: Design and Evaluation Robert A. Sottolare, Jessica Schwarz, 2021-07-03. This two-volume set (LNCS 12792 and 12793) constitutes the refereed proceedings of the Third International Conference on Adaptive Instructional Systems (AIS 2021) held as part of the 23rd International Conference HCI International 2021, which took place in July 2021. Due to the COVID-19 pandemic, the conference was held virtually. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers of AIS 2021 Part I are organized in topical sections named Conceptual Models and Instructional Approaches for AIS, Designing and Developing AIS, Evaluation of AIS, Adaptation Strategies, and Methods in AIS. Chapter Personalized Mastery Learning Ecosystems Using Bloom's Four Objects of Change to Drive Learning in Adaptive Instructional Systems is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Fundamentals of International Aviation Suzanne K. Kearns, 2021-03-21. International aviation is a massive and complex industry that is crucial to our global economy and way of life. Designed for the next generation of aviation professionals, *Fundamentals of International Aviation*, second edition, flips the traditional approach to aviation education. Instead of focusing on one career in one country, it introduces readers to the air transport sector on a global scale with a broad view of all the interconnected professional groups. This text provides a foundation of how aviation works in preparation for any career in the field, including regulators, maintenance engineers, pilots, flight attendants, airline and airport managers, dispatchers, and air traffic controllers among many others. Each chapter introduces a different cross-section of the industry, from air law to operations, security to environmental impacts. A variety of learning tools are built into

each chapter including 24 case studies that describe an aviation accident related to each topic This second edition adds new learning features geographic representation from Africa a new chapter on economics full color illustrations and updated and enhanced online resources This accessible and engaging textbook provides a foundation of industry awareness that will support a range of aviation careers It also offers current air transport professionals an enriched understanding of the practices and challenges that make up the rich fabric of international aviation
