And Fpgas Software Programmers Dirk Koch:

FPGAs for Software Programmers Dirk Koch, Frank Hannig, Daniel Ziener, 2016-06-17 This book makes powerful Field Programmable Gate Array FPGA and reconfigurable technology accessible to software engineers by covering different state of the art high level synthesis approaches e.g. OpenCL and several C to gates compilers. It introduces FPGA technology its programming model and how various applications can be implemented on FPGAs without going through low level hardware design phases. Readers will get a realistic sense for problems that are suited for FPGAs and how to implement them from a software designer's point of view. The authors demonstrate that FPGAs and their programming model reflect the needs of stream processing problems much better than traditional CPU or GPU architectures making them well suited for a wide variety of systems from embedded systems performing sensor processing to large setups for Big Data number crunching. This book serves as an invaluable tool for software designers and FPGA design engineers who are interested in high design productivity through behavioural synthesis, domain specific compilation and FPGA overlays. Introduces FPGA technology to software developers by giving an overview of FPGA programming models and design tools as well as various application examples. Provides a holistic analysis of the topic and enables developers to tackle the architectural needs for Big Data processing with FPGAs. Explains the reasons for the energy efficiency and performance benefits of FPGA processing. Provides a user oriented approach and a sense for where and how to apply FPGA technology.

Parallel Computing: Technology Trends Ian Foster, Ludek Kucera, Wolfgang E. Nagel, Frans Peters, 2020-03-15 The year 2019 marked four decades of cluster computing a history that began in 1979 when the first cluster systems using Components Off The Shelf COTS became operational. This achievement resulted in a rapidly growing interest in affordable parallel computing for solving compute intensive and large scale problems. It also directly led to the founding of the ParCo conference series. Starting in 1983 the International Conference on Parallel Computing ParCo has long been a leading venue for discussions of important developments applications and future trends in cluster computing parallel computing and high performance computing. ParCo2019 held in Prague Czech Republic from 10-13 September 2019 was no exception. Its papers invited talks and specialized mini symposia addressed cutting edge topics in computer architectures programming methods for specialized devices such as field programmable gate arrays FPGAs and graphical processing units GPUs innovative applications of parallel computers approaches to reproducibility in parallel computations and other relevant areas. This book presents the proceedings of ParCo2019 with the goal of making the many fascinating topics discussed at the meeting accessible to a broader audience. The proceedings contains 57 contributions in total all of which have been peer reviewed after their presentation. These papers give a wide ranging overview of the current status of research developments and applications in parallel computing.
