Applied Intelligent Systems John Fulcher, 2012-10-16 Humans have always been hopeless at predicting the future most people now generally agree that the margin of viability in prophecy appears to be 1 ten years Even sophisticated research endeavours in this arena tend to go 2 off the rails after a decade or so The computer industry has been particularly prone to bold and often way off the mark predictions for example I think there is a world market for maybe five computers Thomas J Watson IBM Chairman 1943 I have traveled the length and breadth of this country and talked with the best people and I can assure you that data processing is a fad that won't last out the year Prentice Hall Editor 1957 There is no reason why anyone would want a computer in their home Ken Olsen founder of DEC 1977 and 640K ought to be enough for anybody Bill Gates CEO Microsoft 1981 3 The field of Artificial Intelligence right from its inception has been particularly plagued by bold prediction syndrome and often by leading practitioners who should know better AI has received a lot of bad press 4 over the decades and a lot of it deservedly so How often have we groaned in despair at the latest by the year 20xx we will all have insert your own particular hobby horse here e g Recent Developments and New Directions in Soft Computing Lotfi A. Zadeh, Ali M. Abbasov, Ronald R. Yager, Shahnaz N. Shahbazova, Marek Z. Granular, Fuzzy, and Soft Computing Tsau-Young Lin, Churn-Jung Liao, Janusz Kacprzyk, 2023-03-29 The first edition of the Encyclopedia of Complexity and Systems Science ECSS 2009 presented a comprehensive overview of granular computing GrC broadly divided into several categories Granular computing from rough set theory Granular Computing in Database Theory Granular Computing in Social Networks Granular Computing and Fuzzy Set Theory Grid Cloud Computing as well as general issues in granular computing In 2011 the formal theory of GrC was established providing an adequate infrastructure to support revolutionary new approaches to computer data science including the challenges presented by so called big data For this volume of ECSS Second Edition many entries have been updated to capture these new developments together with new chapters on such topics as data clustering outliers in data mining qualitative fuzzy sets and information flow analysis for security applications Granulations can be seen as a natural and ancient methodology deeply rooted in the human mind Many daily things are routinely granulated into sub things The topography of earth is granulated into hills plateaus etc space and time are granulated into infinitesimal granules and a circle is granulated into polygons of infinitesimal sides Such granules led to the invention of calculus topology and non standard analysis Formalization of general granulation was difficult but as shown in this volume great progress has been made in combining discrete and continuous mathematics under one roof for a broad range of applications in data science
