two books were published in 1996 KH 1996 and 1999 KRS 1999 These workshops fostered precise and explicit specifications of business and system semantics independently of any possible realization Some progress has been made in these areas both in academia and in industry At the same time in too many cases only lip service to elegant specifications of semantics has been provided and as a result the systems we build or buy are all too often not what they are supposed to be We used to live with that and quite often users relied on human intermediaries to sort the things out This approach worked perfectly well for a long time Undergraduate Catalog University of Michigan--Dearborn,2006
