Applications Of Fuzzy Logic In Bioinformatics Applications Of Fuzzy Logic In Bioinformatics:

Applications Of Fuzzy Logic In Bioinformatics Dong Xu, James M Keller, Rajkumar Bondugula, Mihail Popescu, 2008-08-11 Many biological systems and objects are intrinsically fuzzy as their properties and behaviors contain randomness or uncertainty. In addition, it has been shown that exact or optimal methods have significant limitations in many bioinformatics problems. Fuzzy set theory and fuzzy logic are ideal to describe some biological systems, objects, and provide good tools for some bioinformatics problems. This book comprehensively addresses several important bioinformatics topics using fuzzy concepts and approaches, including measurement of ontological similarity, protein structure prediction analysis, and microarray data analysis. It also reviews other bioinformatics applications using fuzzy techniques. Fuzzy Systems in Bioinformatics and Computational Biology Yaochu Jin, Lipo Wang, 2008-12-28 Biological systems are inherently stochastic and uncertain. Thus, research in bioinformatics, biomedical engineering, and computational biology has to deal with a large amount of uncertainties. Fuzzy logic has shown to be a powerful tool in capturing different uncertainties in engineering systems. In recent years, fuzzy logic-based modeling and analysis approaches are also becoming popular in analyzing biological data and modeling biological systems. Numerous research and application results have been reported that demonstrated the effectiveness of fuzzy logic in solving a wide range of biological problems found in bioinformatics, biomedical engineering, and computational biology. Contributed by leading experts worldwide, this edited book contains 16 chapters presenting representative research results on the application of fuzzy systems to genome sequence assembly, gene expression analysis, promoter analysis, cis-regulation logic analysis, and synthesis/reconstruction of genetic and cellular networks, as well as biomedical problems such as medical image processing, electrocardiogram data classification, and anesthesia monitoring and control. This volume is a valuable reference for researchers, practitioners, as well as graduate students working in the field of bioinformatics, biomedical engineering, and computational biology. *The Applications of Bioinformatics in Cancer Detection* Asad Umar, Izet Kapetanovic, Javed Khan (M.D.), 2004 The state of the science of bioinformatics, that is, application of computer processes to solving biological problems and its potential for assisting early cancer detection, risk assessment, and risk reduction, form the focus of this volume. **KI 2009: Advances in Artificial Intelligence** Bärbel Mertsching, Marcus Hund, Zaheer Aziz, 2009-09-18 This book constitutes the thoroughly refereed proceedings of the 32nd Annual German Conference on Artificial Intelligence KI 2009 held in Paderborn, Germany, in September 2009. The 76 revised full papers presented together with 15 posters were carefully reviewed and selected from 126 submissions. The papers are divided into topical sections on planning and scheduling, vision and perception, machine learning and data mining, evolutionary computing, natural language processing, knowledge representation and reasoning, cognition history, and philosophical foundations. AI and engineering, automated reasoning, spatial and temporal reasoning, agents, and intelligent virtual environments, experience and knowledge management, and robotics. in biomedicine artificial intelligence for knowledge management computational intelligence and algorithms and intelligent decision support systems Computational Intelligence - Volume II Hisao Ishibuchi, 2015-12-30 Computational intelligence is a component of Encyclopedia of Technology Information and Systems Management Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Computational intelligence is a rapidly growing research field including a wide variety of problem solving techniques inspired by nature Traditionally computational intelligence consists of three major research areas Neural Networks Fuzzy Systems and Evolutionary Computation Neural networks are mathematical models inspired by brains Neural networks have massively parallel network structures with many neurons and weighted connections Whereas each neuron has a simple input output relation a neural network with many neurons can realize a highly non linear complicated mapping Connection weights between neurons can be adjusted in an automated manner by a learning algorithm to realize a non linear mapping required in a particular application task Fuzzy systems are mathematical models proposed to handle inherent fuzziness in natural language For example it is very difficult to mathematically define the meaning of cold in everyday conversations such as It is cold today and Can I have cold water The meaning of cold may be different in a different situation Even in the same situation a different person may have a different meaning Fuzzy systems offer a mathematical mechanism to handle inherent fuzziness in natural language As a result fuzzy systems have been successfully applied to real world problems by extracting linguistic knowledge from human experts in the form of fuzzy IF THEN rules Evolutionary computation includes various population based search algorithms inspired by evolution in nature Those algorithms usually have the following three mechanisms fitness evaluation to measure the quality of each solution selection to choose good solutions from the current population and variation operators to generate offspring from parents Evolutionary computation has high applicability to a wide range of optimization problems with different characteristics since it does not need any explicit mathematical formulations of objective functions For example simulation based fitness evaluation is often used in evolutionary design Subjective fitness evaluation by a human user is also often used in evolutionary art and music These volumes are aimed at the following five major target audiences University and College students Educators Professional practitioners Research personnel and Policy analysts managers and decision makers *RECENT TRENDS IN COMPUTING, COMMUNICATION AND APPLICATIONS - PROCEEDINGS OF RTCCA-2025* PROF.
