Basic Pre Med Parent Lesson Planner:

Basic Pre-Med Parent Lesson Planner Master Books, 2013-08-01 This Basic Pre Med contains materials for use with The Genesis of Germs and Building Blocks in Life Science Features Each suggested weekly schedule has three easy to manage lessons which combine reading worksheets and vocabulary building Designed to allow your student to be independent materials in this resource are divided by section so you can remove quizzes tests and answer keys before beginning the coursework As always you are encouraged to adjust the schedule and materials as you need to in order to best work within your educational program Workflow Students will read the pages in their book and then answer the questions at the end of each chapter Tests are given at regular intervals

Basic Pre-Med Parent Lesson Plan , 2013-08-01 Basic Pre Med Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Microbiology As the world waits in fear world health organizations race to develop a vaccine for the looming bird flu epidemic a threat that has forced international federal and local governments to begin planning for a possible pandemic and the widespread death and devastation which would follow Will the world find an answer in time Or will we see this threat ravage populations as others have before in 1918 with influenza in the late 18th century with yellow fever or the horrific black death or bubonic plague in 1347 AD Are these viruses examples of evolution Did God make microbes by mistake Are they accidents of evolution out of the primordial soup These timely questions are examined throughout The Genesis of Germs It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from and how do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in this revealing and detailed book He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man's sin and the hope we have in the coming of Jesus Christ Semester 2 Life Science Study clear biological answers for how science and Scripture fit together to honor the Creator Have you ever wondered about such captivating topics as genetics the roll of natural selection embryonic development or DNA and the magnificent origins of life Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the

origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process *Advanced Pre-Med Studies Parent Lesson Plan* ,2013-08-01 Advanced Pre Med Studies Course Description Semester 1 From surgery to vaccines man has made great strides in the field of medicine Quality of life has improved dramatically in the last few decades alone and the future is bright But students must not forget that God provided humans with minds and resources to bring about these advances A biblical perspective of healing and the use of medicine provides the best foundation for treating diseases and injury In *Exploring the History of Medicine* author John Hudson Tiner reveals the spectacular discoveries that started with men and women who used their abilities to better mankind and give glory to God The fascinating history of medicine comes alive in this book providing students with a healthy dose of facts mini biographies and vintage illustrations It seems that a new and more terrible disease is touted on the news almost daily The spread of these scary diseases from bird flu to SARS to AIDS is a cause for concern and leads to questions such as Where did all these germs come from and how do they fit into a biblical world view What kind of function did these microbes have before the Fall Does antibiotic resistance in bacteria prove evolution How can something so small have such a huge deadly impact on the world around us Professor Alan Gillen sheds light on these and many other questions in *The Genesis of Germs* He shows how these constantly mutating diseases are proof for devolution rather than evolution and how all of these germs fit into a biblical world view Dr Gillen shows how germs are symptomatic of the literal Fall and Curse of creation as a result of man s sin and the hope we have in the coming of Jesus Christ Semester 2 *Body by Design* defines the basic anatomy and physiology in each of 11 body systems from a creationist viewpoint Every chapter explores the wonder beauty and creation of the human body giving evidence for creation while exposing faulty evolutionist reasoning Special explorations into each body system look closely at disease aspects current events and discoveries while profiling the classic and contemporary scientists and physicians who have made remarkable breakthroughs in studies of the different areas of the human body Within *Building Blocks in Life Science* you will discover exceptional insights and clarity to patterns of order in living things including the promise of healing and new birth in Christ Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years The evolutionary worldview can be found filtered through every topic at every age level in our society It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions This dynamic education resource helps young people not only learn science from a biblical perspective but also helps them know how to defend their faith in the process *Applied Science: Studies of God's Design in Nature Parent Lesson Planner* ,2014-03-01 Applied Science Studies of God s Design in Nature Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility *Made in Heaven Science* shamelessly steals

from God's creation yet refuses to give God the glory Discover how the glow of a cat's eyes innovates road reflectors the naturally sticky inspirations for Velcro and barbed wire as well as a fly's ear the lizard's foot the moth's eye and other natural examples are inspiring improvements and new technologies in our lives Engineers and inventors have long examined God's creation to understand and copy complex proven mechanics of design in the science known as biomimicry Much of this inspiration is increasingly drawn from amazing aspects of nature including insects to plants to man in search of wisdom and insight We are surrounded daily by scientific advancements that have become everyday items simply because man is copying from God's incredible creation without acknowledging the Creator Champions of Invention The great minds of the past are still with us today in many ways Individuals who explored the natural world hundreds and thousands of years ago have given us a treasure of knowledge in all the sciences In this exciting series from educator author John Hudson Tiner short biographies of the world's most gifted thinkers will inspire the leaders of tomorrow Study the life of the forgotten inventor Joseph Henry whose exploration of electricity set the standard for later innovators Find out how a personal tragedy paved the way for Samuel F B Morse to put aside his painting and develop the telegraph These valuable learning guides will give students accurate accounts of lives from the halls of science and explain what those scientists believed about the world around them Discovery of Design From the frontiers of scientific discovery researchers are now taking design elements from the natural world and creating extraordinary breakthroughs that benefit our health our quality of life and our ability to communicate and even help us work more efficiently An exciting look at cutting edge scientific advances Discovery of Design highlights incredible examples that include How things like batteries human organ repair microlenses automotive engineering paint and even credit card security all have links to natural designs Innovations like solar panels in space unfurled using technology gleaned from beech tree leaves and optic research rooted in the photonic properties of opal gemstones Current and future research from the fields of stealth technology communications cosmetics nanotechnology surveillance and more Take a fantastic journey into the intersection of science and God's blueprints for life discovering answers to some of the most intricate challenges we face in a multi purpose educational supplement **Geology & Biblical**

History Parent Lesson Plan ,2013-09-20 This Geology Biblical History Curriculum Guide contains materials for use with Your Guide to the Grand Canyon Your Guide to Zion and Bryce Canyon National Parks Your Guide to Yellowstone and Grand Teton National Park Explore the Grand Canyon DVD Explore Yosemite and Zion National Parks DVD and Explore Yellowstone DVD Lesson Planner Weekly Lesson Schedule Student Worksheets Quizzes Test Answer Key 8th 9th grade 1 Year Science 1 Credit Features Each suggested weekly schedule has three easy to manage lessons which combine reading worksheets and vocabulary building opportunities including an expanded glossary for each book Designed to allow your student to be independent materials in this resource are divided by section so you can remove quizzes tests and answer keys before beginning the coursework As always you are encouraged to adjust the schedule and materials as you need to in order to best

work within your educational program Workflow Students will read the pages in their book and then complete each section of the study guide worksheets Tests are given at regular intervals with space to record each grade Younger students may be given the option of taking open book tests Lesson Scheduling Space is given for assignment dates There is flexibility in scheduling For example the parent may opt for a M W schedule rather than a M W F schedule Each week listed has five days but due to vacations the school work week may not be M F Please adapt the days to your school schedule As the student completes each assignment he she should put an X in the box

Intro to Oceanography & Ecology Parent Lesson Plan
,2013-08-01 Introduction to Ocean and Ecology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Oceans The oceans may well be earth s final frontier These dark and sometimes mysterious waters cover 71 percent of the surface area of the globe and have yet to be fully explored Under the waves a watery world of frail splendor foreboding creatures and sights beyond imagination awaits The Ocean Book will teach you about giant squid and other monsters of the seas centuries of ocean exploration hydrothermal vents the ingredients that make up the ocean harnessing the oceans energy icebergs coral reefs ships submarines and other ocean vessels the major ocean currents El Ni o whirlpools and hurricanes harvesting the ocean s resources whales dolphins fish and other sea creatures Learning about the oceans and their hidden contents can be exciting and rewarding The abundance and diversity of life the wealth of resources and the simple mysteries there have intrigued explorers and scientists for centuries A better understanding of our oceans ensures careful conservation of their grandeur and beauty for future generations and lead to a deeper respect for the delicate balance of life on planet Earth Semester 2 Ecology Study the relationship between living organisms and our place in God s wondrous creation Learn important words and concepts from different habitats around the world to mutual symbiosis as a product of the relational character of God This is a powerful biology focused course specially designed for multi age teaching Students will Study the intricate relationship between living organisms and our place in God s wondrous creation Examine important words and concepts from different habitats around the world to our stewardship of the world s resources Gain insight into influential scientists and their work More fully understand practical aspects of stewardship Investigate ecological interactions and connections in creation The Ecology Book encourages an understanding of a world designed not as a series of random evolutionary accidents but instead as a wondrous well designed system of life around the globe created to enrich and support its different features Activities provide additional ways to make the learning experience practical

Concepts of Earth Science & Chemistry Parent Lesson Plan John Hudson Tiner,2013-08-26 Concepts of Earth and Chemistry Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one

another to allow flexibility Semester 1 Earth Blending a creationism perspective of history with definitions of terms and identification of famous explorers scientists etc this book gives students an excellent initial knowledge of people and places encouraging them to continue their studies in depth Semester 2 Chemistry Chemistry is an amazing branch of science that affects us every day yet few people realize it or even give it much thought Without chemistry there would be nothing made of plastic there would be no rubber tires no tin cans no televisions no microwave ovens or something as simple as wax paper This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers Find out why pure gold is not used for jewelry or coins Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life See how people in the 1870s could jump over the top of the Washington Monument Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information *Intro to Meteorology & Astronomy Parent Lesson Planner*, 2013-08-01

Introduction to Meteorology and Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Meteorology The Earth was created to be the dwelling place of man It is a complex world and its weather patterns affect our lives every day Whether you live near the equator a polar region or somewhere in between knowledge of the weather is important The Weather Book will teach you why our exact distance from the sun allows life on earth how the weather on the other side of the earth affects you how clouds form and how to identify the different types what the difference is between a cold and warm front why you can often see lightning long before you can hear thunder how to build your own weather station how to survive in dangerous weather what the greenhouse effect and the ozone hole are what Noah s flood and the Ice Age have in common how weatherpersons forecast hurricanes and tornadoes how to read a weather map and what our responsibility is to the environment Learning about the weather is fun It will change the way you look at the clouds in the sky Now you ll have more of an understanding about what is going on miles above your head And when you hear a weather report on television you will understand so much more about the world around you Semester 2 Astronomy One thing we have in common with the ancients is that all of the human race has gazed at the night sky and the bright morning and wondered What s out there Our universe is so vast and awe inspiring that to learn about it is to learn about ourselves The Astronomy Book will teach you what long ago astronomers thought about other worlds solar system facts how constellations relate to astrology the history of space exploration black holes do they exist the origin and age of the moon why Mars doesn t support life the composition of stars supernova remnants and the myth of star birth asteroid legends and the extinction of the dinosaurs are there planets outside our solar system and could they be home to intelligent life what are UFOs and the age of comets and meteor showers Learning about the universe is huge fun In the almost infinite expanse above us we can examine planets galaxies and

phenomena so beautiful and complex that we never outgrow a childlike wonder We see our own reflection in the moon the stars and in comet trails The more we learn the less we fear

Concepts of Biogeography & Astronomy Parent Lesson Planner ,2014-03-18 Concepts of Biogeography materials for each semester are independent of one another to allow flexibility Semester 1 Biogeography It has been said that our planet is really just an insignificant speck in a vast universe but that s not true In fact the conditions for life found on Earth are supremely unique and make our life here comfortable This despite the reality that the world around us is also tainted and in need of careful calibration to continue This book opens a window to the spectacular environments found on our planet from deserts to the tropics Researcher and biologist Dr Gary Parker brings his vast knowledge of ecology to a teaching setting exploring and explaining ecosystems population growth habitats adaptations energy problems and much more Learn about insect control in California why mammals have fur and how sharks maintain friendships with small fish known as remora Exploring the World Around You brings the varieties of our planet s habitats alive to the reader Semester 2 Astronomy Think you know all there is to know about our solar system You might be surprised at some of the amazing details that you find when you begin Exploring the World of Astronomy From the rugged surface of the moon to the distant and mysterious constellations this book provides an exciting educational tour for students of different ages and skill levels Learn about a blue moon the 400 year storm on Jupiter and what is meant by the zone of life Discussion ideas questions and research opportunities help expand this great resource on observational astronomy into an unforgettable educational course for middle school to high school students

Intro to Archaeology & Geology Parent Lesson Plan ,2013-08-01 Introduction to Archaeology and Geology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Archaeology The Archaeology Book takes you on an exciting exploration of history and ancient cultures You will learn both the techniques of the archaeologist and the accounts of some of the richest discoveries of the Middle East that demonstrate the accuracy and historicity of the Bible You will unearth how archaeologists know what life was like in the past why broken pottery can tell more than gold or treasure can some of the difficulties in dating ancient artifacts how the brilliance of ancient cultures demonstrates God s creation history of ancient cultures including the Hittites Babylonians and Egyptians the early development of the alphabet and its impact on discovery the numerous archaeological finds that confirm biblical history and why the Dead Sea scrolls are considered such a vital breakthrough Filled with vivid full color photos detailed drawings and maps you will have access to some of the greatest biblical mysteries ever uncovered Semester 2 Geology Rocks firmly anchored to the ground and rocks floating through space fascinate us Jewelry houses and roads are just some of the ways we use what has been made from geologic processes to advance civilization Whether scrambling over a rocky beach or gazing at spectacular meteor showers we can t get enough of geology The Geology Book will teach what

really carved the Grand Canyon how thick the Earth's crust is why the Earth is unique for life the varied features of the Earth's surface from plains to peaks how sedimentary deposition occurs through water wind and ice effects of erosion ways in which sediments become sedimentary rock fossilization and the age of the dinosaurs the powerful effects of volcanic activity continental drift theory radioisotope and carbon dating geologic processes of the past Our planet is a most suitable home Its practical benefits are also enhanced by the sheer beauty of rolling hills solitary plains churning seas and rivers and majestic mountains all set in place by processes that are relevant to today's entire population of this spinning rock we call home
