Grammatical and Syntactical Approaches in Architecture: Emerging Research and Opportunities Lee, Ju Hyun, Ostwald, Michael J., 2019-12-20 Shape grammar and space syntax have been separately developed but rarely combined in any significant way The first of these is typically used to investigate or generate the formal or geometric properties of architecture while the second is used to analyze the spatial topological or social properties of architecture Despite the reciprocal relationship between form and space in architecture it is difficult to conceptualize a completed building without a sense of both of these properties the two major computational theories have been largely developed and applied in isolation from each another Grammatical and Syntactical Approaches in Architecture Emerging Research and Opportunities is a critical scholarly resource that explores the relationship between shape grammar and space syntax for urban planning and architecture and enables the creative discovery of both the formal and spatial features of an architectural style or type This book furthermore presents a new method to selectively capture aspects of both the grammar and syntax of architecture Featuring a range of topics such as mathematical analysis spatial configuration and domestic architecture this book is essential for architects policymakers urban planners researchers academicians and students

Scandalous Space Alessandro Zambelli, 2019-10-01 If architecture is a design centred discipline which proceeds by suggesting propositional constructions then Zambelli argues archaeology also designs but in the form of reconstructions He proposes that whilst practitioners of architecture and archaeology generally purport to practice in future facing and past facing modes respectively elements of these disciplines also resemble one another Zambelli speculates that whilst some of these resemblances have remained explicit and revealed others have become occluded with time but that all such resemblances share homological similarities of interconnected disciplinary origin making available in the scandalous space between them a logically underpinned visually analogical form of practice
