Contemporary Kantian Metaphysics R. Baiasu, G. Bird, A. Moore, 2012-02-07 Responding to growing interest in the Kantian tradition and in issues concerning space and time this volume offers an insightful and original contribution to the literature by bringing together analytical and phenomenological approaches in a productive exchange on topical issues such as action perception the body and cognition and its limits [The Intentional Spectrum and Intersubjectivity](#) Michael D. Barber, 2011-05-18 World renowned analytic philosophers John McDowell and Robert Brandom dubbed Pittsburgh Neo Hegelians recently engaged in an intriguing debate about perception In *The Intentional Spectrum and Intersubjectivity* Michael D Barber is the first to bring phenomenology to bear not just on the perspectives of McDowell or Brandom alone but on their intersection He argues that McDowell accounts better for the intelligibility of empirical content by defending holistically functioning reflectively distinguishable sensory and intellectual intentional structures He reconstructs dimensions implicit in the perception debate favoring Brandom on knowledge's intersubjective features that converge with the ethical characteristics of intersubjectivity Emmanuel Levinas illuminates Phenomenology becomes the third partner in this debate between two analytic philosophers critically mediating their discussion by unfolding the systematic interconnection among

Studies in Transcendental Phenomenology V. C. Thomas, 2023-01-31 Known as the founder of the phenomenological movement this book examines Husserl's various phases of phenomenology during his realist transcendental static genetic and post-Crisis of European Sciences periods. Consisting of ten carefully researched and thoroughly examined essays, this book describes Husserl's concepts and ideas through numerous examples and diagrammatic representations in a bid to elucidate the nuances of phenomenology for its readers. Valuable insights into Husserl's realist phase are made in the chapter on Meaning and the chapters on Natural Attitude, Epoch and Phenomenological Reduction, while the chapter on Noesis-Noema symbolizes the transcendental phase. Thomas points out Husserl's transition from static to genetic phenomenology in the chapter on Lived Body, with the chapters on Lifeworld and the Notion of the Other later focusing on this perspective. Husserl's entire phenomenological space, including his pre-phenomenological period, are covered in the chapter on Lived Time. However, the chapters on Phenomenology, The Study of Self and Beyond, and Consciousness and Intentionality are the fulcrums upon which the edifice of phenomenology turns. The final chapter on Presuppositionlessness in phenomenology expresses Thomas's personal enquiries into Husserl's contention that phenomenology is a presuppositionless science. This book will be of particular interest to research scholars and postgraduate students in the areas of Philosophy and Social Sciences, as well as those interested in contemporary Western Philosophy and the history and development of Ideas.
