Criminal Justice in the 21st Century (4th Edition) Laura J. Moriarty, 2025-03-26 The fourth edition of Criminal Justice Technology in the 21st Century comes just about five years after the COVID 19 pandemic when technology took a more prominent role in our everyday lives and more importantly in the criminal justice system Ideas that once were mere thoughts from academics pondering the future have become everyday realities While most areas of life came to a standstill as the pandemic ensued the criminal justice system could not stop Crime adapts more seamlessly than other aspects of society and as such the criminal justice system needed to adapt as well The contributing authors were asked to consider the pandemic and its impact on evolving technology and advancements to address crime Likewise other societal concerns focusing on law enforcement and its questionable use of force at times have escalated the need for technology to ensure that over policing in minority neighborhoods and accountability is established or not to deescalate violence whether police brutality or protester police violence The impact of technology remains to be seen but there is real hope that such technology can begin to shed light on what is happening in these volatile situations Either the current contributors have updated their chapters from the Third Edition or there are new contributors focusing on the abovementioned issues This fourth edition with more than 20 contributors highlights the most current thinking about criminal justice technology The book is longer than the previous editions but has fewer chapters This is the result of paring down what is included in this new edition The hope is that these chapters will be the most relevant and useful to both the expert and the neophyte Criminal justice technology will continue to advance and we must keep abreast of new trends

Taser Electronic Control Devices and Sudden In-custody Death Howard E. Williams, 2008 Negative sentiment regarding conducted energy weapons is due largely to a lack of understanding about the technology behind such weapons and a misunderstanding of those weaponsOCO physiological effects Media accounts that speculatively associate sudden in custody deaths with the use of conducted energy weapons only add to the confusion TASER ELECTRONIC CONTROL DEVICES AND SUDDEN IN CUSTODY DEATH documents 310 deaths in the United States proximate to the application of TASER electronic control devices from 1983 through 2006 The study examines the phenomenon of sudden death as it relates to electromuscular disruption technology and TASER electronic control devices by constructing 213 cases studies dating from 1983 through 2005 and analyzing information available from news accounts police reports and autopsies After reviewing the available evidence from this extensive case study the author concludes that these conducted energy weapons are excluded as the cause of death in 182 of the 212 cases In only two cases did the evidence tend to confirm the weapon was either a cause of death or a significant contributing factor While arguing that the TASER electronic control devices are safe less lethal weapons the author also cautions that they are not completely effective He notes that the weapons were not effective in subduing more than 60 percent of violent or aggressive subjects in the 213 case studies and he documents 131 cases of fatal police shootings and one police fatality following the failure of the weapons The only way to determine whether the TASER electronic control devices is responsible for deaths is to separate evidence from conjecture and analyze the facts of each case This book will be an excellent resource for law enforcement professionals attorneys investigators and criminal justice personnel
