Strategic Shakespeare Ariane M. Balizet,Natalie K. Eschenbaum,Marcela Kostihová,2025-05-30 Strategic Shakespeare demonstrates the value of humanities trained scholars as leaders in higher education It features contributions from Renaissance and Shakespearean scholars in leadership roles in North American higher education who collectively aim to leverage traditional assumptions about Shakespeare in the service

of a more inclusive and sustainable academy Making a powerful case for the liberal arts the contributors demonstrate ways in which training in the humanities creates a baseline of skills in collaboration deep listening tolerance for ambiguity and a range of positionalities They also illustrate an astute understanding of disparate data sets persuasive storytelling and a commitment to liberal arts education As this innovative collection showcases these skills are crucial in the current climate as higher education struggles with declining enrolments decreasing budgets growing public distrust and often hostile legislative oversight Additionally the skills help us navigate a rapidly shifting landscape of learning in the aftermath of the COVID 19 pandemic and entry of generative artificial intelligence AI to the public sphere The collection presents theoretical arguments case studies personal narratives and practical advice related to how humanities trained scholars have led and must continue to lead the academy through transformative change Strategic Shakespeare is an essential tool for anyone interested in learning from university leaders who have made good things happen on their campuses in their communities and in the profession It celebrates and foregrounds the core adaptive skills that humanities scholars bring to the table showcasing their unique predisposition for successful academic leadership during a time of unprecedented change Alternative Universities

David J. Staley, 2019-03-26 Imagining the universities of the future How can we re envision the university Too many examples of what passes for educational innovation today MOOCs especially focus on transactions on questions of delivery In Alternative Universities David J Staley argues that modern universities suffer from a poverty of imagination about how to reinvent themselves Anyone seeking innovation in higher education today should concentrate instead he says on the kind of transformational experience universities enact In this exercise in speculative design Staley proposes ten models of innovation in higher education that expand our ideas of the structure and scope of the university suggesting possibilities for what its future might look like What if the university were designed around a curriculum of seven broad cognitive skills or as a series of global gap year experiences What if as a condition of matriculation students had to major in three disparate subjects What if the university placed the pursuit of play well above the acquisition and production of knowledge By asking bold What if questions Staley assumes that the university is always in a state of becoming and that there is not one idea of the university to which all institutions must aspire This book specifically addresses those engaged in university strategy university presidents faculty policy experts legislators foundations and entrepreneurs those involved in what Simon Marginson calls university making Pairing a critique tempered to our current moment with an explanation of how change and disruption might contribute to a new golden age for higher education Alternative Universities is an audacious and essential read

Reconstructing the "Uni-versity" Harvey J. Graff, 2025-09-14 Slogans myths and isolated anecdotes are inadequate substitutes for documented history and contextual understanding Literature on the history of higher education is dominated by ahistorical and contextually ignorant slogans Seldom acknowledged in discussions of the decline or failure of the modern university is 1 how long it has been going on at least since the 1960s and 2 universities own complicity in this long

complicated and contradictory process Myths intertwine inseparably with slogans to echo yet another lost cause Our collective as well as individual pasts provide essential lessons if we know how to read and learn from them More complicated is imagining a plausible better future for universities In *Reconstructing the University From the Ashes of the Mega and Multi* versity to the Futures of Higher Education Harvey J Graff bringing experience from over 50 years as a professor provides an accurate history of higher education redefining the issues and terms to establish a new agenda *A Radical Proposal to Reinvigorate the Teaching of the Liberal Arts* Michael Wayne Santos, 2020-09-15 This book offers a clarion call in the words of Franklin Roosevelt to try something And not just any something A systematic integrated chronological multi disciplinary approach to reinvigorate the teaching of the liberal arts and put them back where they belong at the center of a student s educational experience It does not pretend to offer a cure all or a one size fits all solution to everything that is ailing American higher education or even secondary education It does however offer a place to begin a discussion to invite experimentation and to initiate reform based on solid pedagogy and 2 500 years of time tested wisdom in the human experience As such it should be of interest to many people Those in higher education serious about the crisis facing their institutions could benefit from taking up the gauntlet this volume throws down For students and parents the book raises alternatives and poses some hard questions that they should be asking not only as they consider colleges and universities but of their secondary schools In fact anyone who keeps a close eye on the state of education would be interested in what this book adds to the discussion
