Wasted Lives Zygmunt Bauman, 2013-04-26 The production of human waste or more precisely wasted lives the superfluous populations of migrants refugees and other outcasts is an inevitable outcome of modernization It is an unavoidable side effect of economic progress and the quest for order which is characteristic of modernity As long as large parts of the world remained wholly or partly unaffected by modernization they were treated by modernizing societies as lands that were able to absorb the excess of population in the developed countries Global solutions were sought and temporarily found to locally produced overpopulation problems But as modernization has reached the furthest lands of the planet redundant population is produced everywhere and all localities have to bear the consequences of modernity's global triumph They are now confronted with the need to seek in vain it seems local solutions to globally produced problems The global spread of the modernity has given rise to growing quantities of human beings who are deprived of adequate means of survival but the planet is fast running out of places to put them Hence the new anxieties about immigrants and asylum seekers and the growing role played by diffuse security fears on the contemporary political agenda With characteristic brilliance this new book by Zygmunt Bauman unravels the impact of this transformation on our contemporary culture and politics and shows that the problem of coping with human waste provides a key for understanding some otherwise baffling features of our shared life from the strategies of global domination to the most intimate aspects of human relationships
