Breeding In Captivity One Woman's Unusual Path To Motherhood:

Breeding in Captivity Stacy Bolt, 2013-08-29 *Breeding in Captivity* takes us on Stacy Bolt's journey to have a child at advanced maternal age first with the help of a Really Expensive fertility specialist and then ultimately through a local adoption agency But this isn't your typical serious memoir about struggling with infertility it's an entertaining witty read that perfectly balances humor with its more poignant moments *Breeding in Captivity* is about a quirky lovable couple that you root for through their fertility struggles and adoption adventures It's about the hundreds of Internet message boards where annoyingly perky women from Kappa Alpha Fruitcake refer to sex as babydancing and sprinkle virtual baby dust on each other It's about meeting birthmothers and deciding on open adoptions It's about being chosen and then having a birthmother change her mind But ultimately it's about hope how life can surprise you and laughing through the insanity **The**

Primates Kurt Benirschke,2012-12-06 This conference represents the first time in my life when I felt it was a misfortune rather than a major cause of my happiness that I do conservation work in New Guinea Yes it is true that New Guinea is a fascinating microcosm it has fascinating birds and people and it has large expanses of undisturbed rainforest In the course of my work there helping the Indonesian government and World Wildlife Fund set up a comprehensive national park system I have been able to study animals in areas without any human population But New Guinea has one serious drawback it has no primates except for humans Thus I come to this conference on primate conservation as an underprivileged and emotionally deprived observer rather than as an involved participant Nevertheless it is easy for anyone to become interested in primate conservation The public cares about primates More specifically to state things more realistically many people care some of the time about some primates Primates are rivaled only by birds pandas and the big cats in their public appeal For some other groups of animals the best we can say is that few people care about them infrequently For most groups of animals no one cares about them ever
