Acute Medicine In The Frail Elderly:

Acute Medicine in the Frail Elderly Henry Woodford, James George, 2021-06-09 Frail older people now contribute the majority of the acute emergency take both medical and surgical. Despite this there is often a lack of confidence and knowledge among doctors and nurses in treating older people in the Emergency Department and on Emergency Assessment Units. From the Preface Emergency care of frail older people is challenging but very rewarding. Older patients tend to be complex and therefore their assessment needs to be more extensive and include comprehensive geriatric assessment. It is the extras in their assessment that are not usually needed in younger patients such as cognitive functional and social evaluations that make the difference in achieving a better outcome. This book describes the key features of high quality care for frail elderly patients in acute hospital settings. With chapters on assessment and the characteristic non specific ways that patients tend to present such as confusion collapse query cause and effect this practical guide is ideal to have on hand. As well as common medical and surgical conditions it also covers medication management elder abuse pressure ulcers and hypothermia including the physiological changes seen in ageing and ways to define frail patients. Tables diagrams and images are ideal for quick reference and key points are summarised throughout the text to aid comprehension providing doctors nurses and therapists with both background and essential information to provide the excellent acute care older people deserve.

Pathy's Principles and Practice of Geriatric Medicine Alan J. Sinclair, John E. Morley, Bruno Vellas, 2012-03-13 This new edition of the comprehensive and renowned textbook Principles and Practice of Geriatric Medicine offers a fully revised and updated review of geriatric medicine. It covers the full spectrum of the subject features 41 new chapters and provides up to date evidence based and practical information about the varied medical problems of ageing citizens. The three editors from UK USA and France have ensured that updated chapters provide a global perspective of geriatric medicine as well as reflect the changes in treatment options and medical conditions which have emerged since publication of the 4th edition in 2006. The book includes expanded sections on acute stroke dementia cardiovascular disease and respiratory diseases and features a new section on end of life care. In the tradition of previous editions this all encompassing text continues to be a must have text for all clinicians who deal with older people particularly geriatric medical specialists gerontologists researchers and general practitioners. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from Google Play or the MedHand Store. Praise for the 4th edition an excellent reference for learners at all clinical and preclinical levels and a useful contribution to the geriatric medical literature. Journal of the American Medical Association November 2006 5th edition selected for 2012 Edition of Doody's Core Titles™ **Acute Medicine E-Book** Derek G. Waller, 2016-09-13 Acute Medicine is a new e book in a collection of subject themed e books containing relevant key articles from Medicine. The e books provide a perfect source of revision for post graduate exams in clinical medicine and portfolio material for life long learning. interest in a specific area to buy individual articles at a price point that will give affordable access to all readers from medical students to GPs and practitioners in related areas The quality of user experience on mobiles tablets and laptops will be an added bonus for learning on the move The whole board has been involved in the creation of this content and are therefore listed as authors on all the e books In addition we extend our warm thanks for their contribution to these e books to the past Chairman Allister Vale who stepped down from the board in 2015 and to John Mucklow who stepped down in 2016 Derek Waller on behalf of the Editorial Board About the journal The parent journal www.medicinejournal.co.uk is a rolling continuously updated review of clinical medicine over a 4 year cycle covering all the important topics for core medical training Its Editorial Board comprises some of Europe s most influential specialists The journal s articles are refreshed updated augmented or replaced as appropriate each time the subject is due for revision to provide a concise overview of knowledge and practice core to the curriculum Each article is written by invited experts and overseen by the relevant subject specialist on the Board A trainee representative on the Board ensures relevance and accessibility for exam candidates About the Medicine journal e books Acute Medicine is a new e book in a collection of subject themed e books containing relevant key articles from Medicine The e books provide a perfect source of revision for post graduate exams in clinical medicine and portfolio material for life long learning As well as mapping to the UK Core Medical Training curriculum these e books also enable anyone with a short term interest in a specific area to buy individual articles at a price point that will give affordable access to all readers from medical students to GPs and practitioners in related areas The quality of user experience on mobiles tablets and laptops will be an added bonus for learning on the move The whole board has been involved in the creation of this content and are therefore listed as authors on all the e books In addition we extend our warm thanks for their contribution to these e books to the past Chairman Allister Vale who stepped down from the board in 2015 and to John Mucklow who stepped down in 2016 Derek Waller on behalf of the Editorial Board About the journal The parent journal www.medicinejournal.co.uk is a rolling continuously updated review of clinical medicine over a 4 year cycle covering all the important topics for core medical training Its Editorial Board comprises some of Europe s most influential specialists The journal s articles are refreshed updated augmented or replaced as appropriate each time the subject is due for revision to provide a concise overview of knowledge and practice core to the curriculum Each article is written by invited experts and overseen by the relevant subject specialist on the Board A trainee representative on the Board ensures relevance and accessibility for exam candidates

Geriatric Emergencies Iona Murdoch,Sarah Turpin,Bree Johnston,Alasdair MacLulich,Eve Losman,2015-02-23 Geriatric Emergencies is a practical guide to the common conditions affecting older patients who present in an emergency to hospital or primary care Beginning with the essentials of history taking and clinical examination the book covers a comprehensive range of emergencies emphasizing the different management approaches which may be required in older patients Common geriatric presentations such as falls delirium and stroke are explored in

detail in addition to more diverse topics such as abdominal pain major trauma and head injury Ethical considerations such as advanced care planning palliative care and capacity assessment are discussed with practical tips on communicating with patients and their relatives Geriatric Emergencies provides concise up to date guidance to the emergency management of the older patient It is a recommended resource for all health professionals working in the acute environment in which a large proportion of patients are aged over 65

Emergency laparoscopic surgery in the elderly and frail patient Ferdinando Agresta, Mauro Podda, Fabio Cesare Campanile, Carlo Bergamini, Gabriele Anania, 2021-08-31 The global population is aging rapidly and as a result emergency abdominal surgery for acute abdomen in the elderly has become a global issue Demographic changes in the population have also altered the profile of emergency abdominal surgery with typical causes of acute abdomen in the elderly including acute cholecystitis incarcerated hernia bowel obstruction and appendicitis In these patients recovery from surgery is often complicated leading to longer hospital stays compared with younger patients Laparoscopy in the emergency setting is well established and offers a number of advantages over open surgical approaches such as reduced postoperative pain length of hospital stay and complication rates While laparoscopic surgery for acute diverticulitis has become more widespread in other conditions like small bowel obstruction and perforated peptic ulcer laparotomy is still used in about 70% of cases Further despite the urgent need for knowledge regarding surgical treatment of acute abdomen in the elderly there is still a lack of evidence in this relevant clinical field This book analyzes the management strategies and critically evaluates the outcomes of laparoscopic emergency surgery for acute abdomen in the elderly according to the principles of evidence based medicine Discussing each topic clearly and promoting the use of emergency laparoscopy in elderly patients the book is intended for young general surgeons and surgeons in training with at least a basic knowledge of surgery for acute abdomen It is also useful as a quick reference tool during on call shifts

Fragility Fracture and Orthogeriatric Nursing Karen Hertz, Julie Santy-Tomlinson, 2023-11-08 This second edition in Open Access aims to provide a comprehensive and practical overview of the knowledge required for the assessment and management of the older adult with or at risk of fragility fracture with additional focus on those who are frail It considers this from the perspectives of all the clinical and home care settings in which this group of patients receive care and is relevant to all global locations The concept of orthogeriatric care is explored in detail Global estimates suggest that there were 21 million men and 137 million women aged 50 years or more at high fracture risk in 2010 This incidence is expected to double by 2040 with the most significant increase in Asia Fragility fracture is one of the foremost challenges for health care providers and the global demand for nursing care for patients with fragility fractures across the world is immense Hip fracture is particularly challenging as these significant injuries often occur in frail older people requiring hospitalisation and orthopaedic surgery Such injuries and associated surgery result in increased frailty worsening health and wellbeing pain disability reduced quality of life loss of independence and decreased life expectancy Care providers need to understand the experience of

fragility fracture from the perspective of patients and families so that direct improvements in care can be based on the perspectives of the users Expert care of patients following fractures that require hospitalisation and orthopaedic surgery involves skill in the care and treatment of frail older people as we as individuals with an injury and undergoing surgery Nurses have a significant role in interdisciplinary collaborative care provided through orthogeriatric models of care There is increasing evidence that such models significantly improve patient outcomes High quality evidence based orthogeriatric care is increasingly shown to have positive impact on outcomes for recovery rehabilitation and secondary prevention of further fracture This book significantly supports the aims and values of the Fragility Fracture Network and as such supports the learning needs of nurses and other allied health professionals which will enable a comprehensive approach to nursing practice in orthogeriatric and fragility fracture care

Oxford Textbook of Geriatric Medicine Jean-Pierre Michel,B. Lynn Beattie,Finbarr C. Martin,Jeremy D. Walston,2018 The third edition of the definitive international reference book on all aspects of the medical care of older persons will provide every physician involved in the care of older patients with a comprehensive resource on all the clinical problems they are likely to encounter as well as on related psychological philosophical and social issues

Hong Kong's Health System Gabriel M. Leung,John Bacon-Shone,2006-01-01 This book provides a significant contribution to the discussions about the future of the system The evidence driven content draws from the deep expertise and experience of a wide spectrum of contributors who represent virtually all relevant areas of the health system

Fragility Fracture Nursing Karen Hertz,Julie Santy-Tomlinson,2018-06-15 This open access book aims to provide a comprehensive but practical overview of the knowledge required for the assessment and management of the older adult with or at risk of fragility fracture It considers this from the perspectives of all of the settings in which this group of patients receive nursing care Globally a fragility fracture is estimated to occur every 3 seconds This amounts to 25 000 fractures per day or 9 million per year The financial costs are reported to be 32 billion EUR per year in Europe and 20 billion USD in the United States As the population of China ages the cost of hip fracture care there is likely to reach 1 25 billion USD by 2020 and 265 billion by 2050 International Osteoporosis Foundation 2016 Consequently the need for nursing for patients with fragility fracture across the world is immense Fragility fracture is one of the foremost challenges for health care providers and the impact of each one of those expected 9 million hip fractures is significant pain disability reduced quality of life loss of independence and decreased life expectancy There is a need for coordinated multi disciplinary models of care for secondary fracture prevention based on the increasing evidence that such models make a difference There is also a need to promote and facilitate high quality evidence based effective care to those who suffer a fragility fracture with a focus on the best outcomes for recovery rehabilitation and secondary prevention of further fracture The care community has to understand better the experience of fragility fracture from the perspective of the patient so that direct improvements in care can be based on the perspectives of the users This book supports these needs by providing a comprehensive approach to

nursing practice in fragility fracture care *Sensors for Gait, Posture, and Health Monitoring Volume 2* Thurmon Lockhart, 2020-06-17 In recent years many technologies for gait and posture assessments have emerged Wearable sensors active and passive in house monitors and many combinations thereof all promise to provide accurate measures of physical activity gait and posture parameters Motivated by market projections for wearable technologies and driven by recent technological innovations in wearable sensors MEMs electronic textiles wireless communications etc wearable health performance research is growing rapidly and has the potential to transform future healthcare from disease treatment to disease prevention The objective of this Special Issue is to address and disseminate the latest gait posture and activity monitoring systems as well as various mathematical models methods that characterize mobility functions This Special Issue focuses on wearable monitoring systems and physical sensors and its mathematical models can be utilized in varied environments under varied conditions to monitor health and performance

If you ally compulsion such a referred **Acute Medicine In The Frail Elderly** books that will provide you worth, acquire the unquestionably best seller from us currently from several preferred authors. If you desire to humorous books, lots of novels, tale, jokes, and more fictions collections are with launched, from best seller to one of the most current released.
