CPP Study Guide, 13th Edition James Bomba, George Moore, 2008-05 **The Complete Guide for CPP Examination Preparation** Anthony V. DiSalvatore, 2015-07-21 Originally written by a team of Certified Protection Professionals CPPs Anthony DiSalvatore gives valuable updates to *The Complete Guide for CPP Examination Preparation* This new edition contains an overview of the fundamental concepts and practices of security management while offering important insights into the CPP exam Until recently the sec *The Complete Guide for CPP Examination Preparation* James P. Muuss CPP, David Rabern CPP, 2006-06-06 For those preparing for the Certified Protection Professional program and designation *The Complete Guide for CPP Examination Preparation* provides a thorough foundation of essential security concepts and practices in a single volume This guide does more than impart the information required for you to pass the CPP exam it also delivers insight in **CPP Exam Essential Topics Study Guide 2013** ExamREVIEW, 2012-09-23 In the practical real world a CPP may be a security manager an external consultant or a law enforcement agent For purpose of the exam however you want to position yourself as a hired consultant one who acts as an advisor to the company management The company is your client and you are helping it out You advise you guide and you recommend You need to understand your client If your client is absolutely new to security full scale interviews and statistical analysis on crimes may be necessary However if your client has a working security mechanism in place then you should conduct assessment basing primarily on inputs from management In other words management determines the depth and scope of the security project Management makes the decisions You suggest ways to improve then carry out the decisions made by management You don't normally make decisions for your client It is safe to say that you assume the role of project manager for your client's security project The security project would start by discussing the scope of work with your client The most important meeting between you and the client would be the initial goal setting and policy review meeting Senior management is going to get involved and you are going to act as the facilitator From this meeting you become aware of the level of risk your client is willing to assume and accept Your work would then start from there When working on a project it is important to understand the background and operation of the client You also want to know what you are up against Protection against vandalism is totally different from protection against terrorist attack A CPP is more on the planning and management side of security A security guard professional on the other hand is to provide client with professional protective services It is believed that the CPP certification is more general in nature while the PSP certification is way more specific and in depth in physical security To summarize the major knowledge areas include Security Principles and Theories Business Principles Personnel Security Physical Security Information Security Crisis Management Investigations Legal Matters We give you knowledge information relevant to the exam specification To be able to succeed in the real exam you'll need to apply your earned knowledge to the question scenarios Many of the exam questions are written to be less straight forward They tend to be framed within the

context of short scenarios An advice Do NOT rely on a single source for exam preparation To secure exam success always use multiple sources and read as much as possible
