Appalachian Waters 2 The Hudson River And Its Tributaries:

Appalachian Waters 2 Walter F. Burmeister,1974-06-01 *The Hudson River Ecosystem* Karin E. Limburg,Mary A. Moran,William H. McDowell,2012-12-06 The Ecosystems Research Center ERC was established at Cornell University in October 1980 by the Environmental Protection Agency EPA with the goals of 1 Identifying fundamental principles and concepts of ecosystems science and the determination of their importance in understanding and predicting the responses of ecosystems to stress the description of the basic mechanisms that operate within ecosystems and an examination of the stability of ecosystem structure and function in the face of stress 2 Testing the applicability of those theoretical concepts to problems of concern to the EPA through a consideration of retrospective and other case studies In line with these goals the Hudson River ecosystem provided the basis for the first major retrospective study undertaken by the ERC The goal of the project was to develop recommendations concerning how ecosystem monitoring can and should be carried out in support of EPA's regulatory responsibilities Our hope was and is that the experience gained from this study will be broadly applicable to a range of management problems involving estuarine ecosystems and will lead to more effective regulation **Hudson River Estuarine Sanctuary, Grant** ,1982 **Final Environmental Impact Statement** National Ocean Survey. Office of Coastal Zone Management,1982 **Proposed Estuarine Sanctuary Grant Award to the State of New York for a Hudson River Estuarine Sanctuary** ,1982 River of Mountains Peter Lourie,2023-11-15 Lourie completed his trip It took him three weeks and marked the first time anyone has traveled from the source of the Hudson to the mouth in a single vessel The Hudson proved to be a very changeable river It includes seven locks and nine power dams The northern half is a true river with strong current but the lower half is tidal a sunken river from the days of glaciers In its first 165 miles it drops more than 4 000 feet to Albany The second half falls no more than a foot Lourie's account of his trip is a fresh look at one of America's great and complex waterways one of the few in fact that still contains its historical and biological species of fish It is also the longest inland estuary in the world Henry Hudson called it the great river of the mountains Nowadays too often the Hudson is stereotyped as a ruined polluted industrial river Its glorious past is compared to its present neglect In River of Mountains Peter Lourie combines the Hudson's rich history and descriptions of some of the region's most impressive landscape with the residents of its mill towns the loggers commercial fishermen and barge pilots all of whom are proof that the river is still a thriving vital waterway So come with Peter Lourie on his trip come explore with him from a canoe one of this country's great rivers join him in his wonderful adventure **Lives of the Hudson** Ian Berry,Tom Lewis,2010 Included in the book are over twenty new essays by writers Akiko Busch Kathryn Davis Terence Diggory Carolyn Forché Phillip Lopate Rick Moody Tom Sleight and John Stilgoe among many other scholars poets and journalists Book Jacket Wilderness Waterways Ronald M. Ziegler,1979 Adirondack Life ,1991 Potomac Trail and Cycling Guide Robert Shosteck,1973
