Describe the system of the Aral Sea in terms of inputs, outputs, and size.

What happens to matter? What about energy? Thermodynamics state? How does this relate to the Earth system?

Thermodynamics state? How does this relate to the Earth system?

Thermodynamics, not all of the energy from the gasoline you put in your car goes to move the car forward. What happens to the rest?

## Environmental Systems

Describe what happened to the system of the Aral Sea in terms of its inputs, outputs, and size.

The Aral Sea used to be the fourth largest sea on the planet and people used it for rice and cotton and it wasn't very efficient irrigation. Then in 2014, it became a desert.

What happened to the water to the sea? It was evaporated. The water was used for irrigation.

What type of system is Earth with respect to matter? What about energy? Earth is a closed system (it is the atom that makes up) and is conserved on Earth. It is an open system.

What does the First Law of Thermodynamics state? How does this relate to Earth? "Energy cannot be created or destroyed, it can only change form or be transferred to another system." The energy from the sun is transferred to Earth through nuclear fusion. The energy from the sun is transferred to Earth through nuclear fusion. The energy from the sun is transferred to Earth through nuclear fusion.

What does the Second Law of Thermodynamics state? How does this relate to Earth? The second law of thermodynamics states that you cannot break even, it is changed from one form to another, it always moves from a more useful form to a less useful form.

Based on the second law of thermodynamics, not all of the energy from the sun goes to move the car forward. What happens to the rest? The rest can be good for air conditioning, and charging your phone.

Using a systems analysis approach (inputs vs. outputs), describe why global warming is occurring. Inputs (global warming) are absorbing and killing the carbons that maintain temperate heating (output) is occurring.

How does negative feedback affect the steady state of a system? What feedback? A negative feedback is self-regulating and stabilizing because the output

*Environmental Science Student Workbook for Use with Withgott & Laposata's Environment* David Tamm, 2021-02-23 Barron's 5 Steps and the others are great resources for reviewing at the end of the year but this Tamm's Textbook Tools workbook accompanies students all year long. It is filled with assignments that follow the regular textbook chapter by chapter page by page. It gets students to read the book. It can also be used as a review since it is an ongoing notebook of the entire curriculum. All you need is the Miller Spoolman textbook either physical or online. Teachers can copy at will and parents can use it as a student consumable. The rationale for having this workbook now is that publishers are putting so much of their extras online that traditional paper classwork can be left lacking. But now no matter if the textbook itself is written in ink or electrons, serious students will find this a valuable way to write in and keep notes for themselves like generating a portfolio. The activities in this workbook challenge students to apply the concepts, think of real examples, diagram every chapter, and think through things with the authors. It has been updated with examples relating to Covid and the Biden Administration's environmental policy positions. Find TTT Tamm's Textbook Tools on FB or click the author name at the top of this page for the other 40 titles in this series.
