Policy, Committee on Comparative National Innovation Policies: Best Practice for the 21st Century, 2012-08-06 America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military

power in the post war No longer is U S pre eminence assured as a place to turn laboratory discoveries into new commercial products companies industries and high paying jobs As the pillars of the U S innovation system erode through wavering financial and policy support the rest of the world is racing to improve its capacity to generate new technologies and products attract and grow existing industries and build positions in the high technology industries of tomorrow Rising to the Challenge U S Innovation Policy for Global Economy emphasizes the importance of sustaining global leadership in the commercialization of innovation which is vital to America s security its role as a world power and the welfare of its people The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage To this end both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States This report argues that far more vigorous attention be paid to capturing the outputs of innovation the commercial products the industries and particularly high quality jobs to restore full employment America s economic and national security future depends on our succeeding in this endeavor

Industry-Laboratory Partnerships: A Review of the Sandia Science and Technology Park Initiative ,1998 **Advanced Technology Program** National Research Council,Technology and Economic Policy,Board on Science, Technology, and Economic Policy,1999-10-21 The growth in government programs to support high technology industry within national economies and their impact on international science and technology cooperation and on the multilateral trading system are of considerable interest worldwide Accordingly these topics were taken up by STEP in a study carried out in conjunction with the Hamburg Institute for Economic Research and the Institute for World Economics in Kiel One of the principal recommendations for further work emerging from that study was a call for an analysis of the principles of effective cooperation in technology development to include lessons from national and international consortia including eligibility standards and assessments of what new cooperative mechanisms might be developed to meet the challenges of international cooperation in high technology products

The Advanced Technology Program National Research Council,Policy and Global Affairs,Board on Science, Technology, and Economic Policy,2001-08-06 This report examines the operations of the APT reviews its extensive assessment program and provides NRC Committee findings concerning the ATP s operations and recommendations for potential improvements to the program The report includes a summary of a major conference held in April 2000 as well as seven papers including surveys of the industry participants or users of the ATP program a summary of the results of fifty awards detailed assessments of major joint ventures and a description of the current selection process It is the most comprehensive study to date of the program s origins operations achievements and assessment Its conclusion the program works **SBIR/STTR at the Department of Energy** National Academies of Sciences, Engineering, and Medicine,Policy

and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research ProgramâPhase II, 2016-12-20 The Small Business Innovation Research SBIR program is one of the largest examples of U S public private partnerships and was established in 1982 to encourage small businesses to develop new processes and products and to provide quality research in support of the U S government s many missions The Small Business Technology Transfer STTR Program was created in 1992 by the Small Business Research and Development Enhancement Act to expand joint venture opportunities for small businesses and nonprofit research institutions by requiring small business recipients to collaborate formally with a research institution The U S Congress tasked the National Research Council with undertaking a comprehensive study of how the SBIR and STTR programs have stimulated technological innovation and used small businesses to meet federal research and development needs and with recommending further improvements to the programs In the first round of this study an ad hoc committee prepared a series of reports from 2004 to 2009 on the SBIR and STTR programs at the five agencies responsible for 96 percent of the programs operations including the Department of Energy DoE Building on the outcomes from the first round this second round presents the committee s second review of the DoE SBIR program s operations Public private partnerships like SBIR and STTR are particularly important since today s knowledge economy is driven in large part by the nation s capacity to innovate One of the defining features of the U S economy is a high level of entrepreneurial activity Entrepreneurs in the United States see opportunities and are willing and able to assume risk to bring new welfare enhancing wealth generating technologies to the market Yet although discoveries in areas such as genomics bioinformatics and nanotechnology present new opportunities converting these discoveries into innovations for the market involves substantial challenges The American capacity for innovation can be strengthened by addressing the challenges faced by entrepreneurs
