Manufacturing and Service Kanchan Das,Miranda Dixon,2024-05-30 Within manufacturing industries lean manufacturing and systems rooted in lean principles stand out as the most effective tool used to enhance productivity quality and comprehensive economic environmental and social sustainability Lean Manufacturing and Service Fundamentals Applications and Case Studies is not merely a guide to lean tools for cost reduction Instead it showcases lean as a holistic system encompassing design planning management and operations relevant to all organizations Moreover it delves into its integration with Industry 4 0 and its concepts Designed primarily for graduate and undergraduate courses this book is also a valuable resource for industry professionals It features exercises ranging from basic to multifaceted examples insightful case studies and end of chapter challenges A solutions manual and lecture slides are also available to ensure a quality course experience Emerging Optimization Techniques In Production Planning & Control Godfrey C Onwubolu,2002-05-20 This

book proposes a concept of adaptive memory programming AMP for grouping a number of generic optimization techniques used in combinatorial problems The same common features seen in the use of memory and a local search procedure drive these emerging optimization techniques which include artificial neural networks genetic algorithms tabu search and ant systems The primary motivation for AMP therefore is to group and unify all these techniques so as to enhance the computational capabilities that they offer for combinatorial problems encountered in real life in the area of production planning and control The text describes the theoretical aspects of AMP together with relevant production planning and control applications It covers the techniques applications and algorithms The book has been written in such a way that it can serve as an instructional text for students and those who are taking tuition on their own The numerical examples given are first solved manually to enhance the reader s understanding of the material and that is followed by a description of the algorithms and computer results This way the student can fully follow the material The algorithms described for each application are useful to both students and practitioners in grasping how to implement similar applications in computer code using emerging optimization techniques **Proceedings of the International Symposium for Production Research**

2018 Numan M. Durakbasa,M. Günes Gencyilmaz,2018-08-14 The conference aims at forming a unique platform to bring together academicians and practitioners from industrial engineering and management engineering as well as from other disciplines working on production function applying the tools of operational research and production operational management Topics treated include computer aided manufacturing industry 4 0 big data and analytics flexible manufacturing systems fuzzy logic industrial applications information technologies in production management optimization production economy production planning and control productivity and performance management project management quality management risk analysis and management supply chain management Mass Customization Thorsten Blecker,Gerhard

Friedrich, 2006-07-31 *Mass Customization Challenges and Solutions* defines the parameters of the emerging business strategy mass customization. The book will cover the main categories of the area with a systematic examination of the following themes: manufacturing systems and mass customization; supply chain management and mass customization; and information systems and mass customization. In addition to being tightly organized by themes and a carefully selected group of contributors, the Editors will write introductory material to the sections along with introductory and concluding chapters. The result is a book that provides the field with the conceptual framework of mass customization, its tools, its solutions, and real world examples of successful implementations of the business strategy. An important book for academics working in production operations, production manufacturing, industrial engineering, logistics, supply chain management, and industry practitioners.
