A Natural History Of Conifers:

A Natural History of Conifers Aljos Farjon, 2008-01-01 A compelling account of the extraordinary relatives of ordinary garden conifers Leading expert Aljos Farjon provides a compelling narrative that observes conifers from the standpoint of the curious naturalist It starts with the basic question of what conifers are and continues to explore their evolution taxonomy ecology distribution human uses and issues of conservation As the story unfolds many popular misconceptions are dispelled such as the false notion that all conifers have cones The extraordinary diversity of conifers begins to dawn as Farjon describes the diminutive creeping shrub *Microcachrys tetragona* whose strange seed cones resemble raspberries and the prehistoric looking *Araucaria meulleri* The taxonomic diversity of conifers is huge and Farjon goes on to relate how over the course of 300 million years these trees and shrubs have adapted to survive geological upheavals climatic extremes and formidable competition from flowering plants All who seek to learn more about the early history of life on our planet will cherish this book

California Forests and Woodlands Verna R. Johnston, 1996-06-16 From majestic Redwoods to ancient Western Bristlecone Pines California's trees have long inspired artists poets naturalists and real estate developers Verna Johnston's splendid book illustrated with her superb color photographs and Carla Simmons's detailed black and white drawings now offers an unparalleled view of the Golden State's world renowned forests and woodlands In clear vivid prose Johnston introduces each of the state's dominant forest types She describes the unique characteristics of the trees and the interrelationships of the plants and animals living among them and she analyzes how fire flood fungi weather soil and humans have affected the forest ecology The world of forest and woodland animals comes alive in these pages the mating games predation patterns communal life and the microscopic environment of invertebrates and fungi are all here Johnston also presents a sobering view of the environmental hazards that threaten the state's trees acid snow ozone blister rust over logging Noting the interconnectedness of the diverse life forms within tree regions she suggests possible answers to the problems currently plaguing these areas Enriched by the observations of early naturalists and Johnston's many years of fieldwork this is a book that will be welcomed by all who care about California's treasured forests and woodlands

A Handbook of the World's Conifers (2 vols.) Aljos Farjon, 2017-08-28 A 2017 Choice Magazine Outstanding Academic Title Conifers are known to everyone as a conspicuous kind of evergreen trees or shrubs that feature prominently in gardens and parks as well as in many managed forests in the cool to cold temperate regions of the Northern Hemisphere Numerous books have been written about them and continue to appear mostly with a bias towards these uses in Europe and North America This second edition revised and updated of *A Handbook of the World's Conifers* is departing from this traditional approach in that it includes all the world's 615 species of conifers of which some 200 occur in the tropics It gives as much information about these and the Southern Hemisphere conifers as about the better known species drawing on research into the taxonomy biology ecology distribution and uses by the author over nearly 35 years The result is a truly encyclopedic work a true

handbook of all the world's conifers richly illustrated by the author with his line drawings and photographs taken from the natural habitats of the species *An Atlas of the World's Conifers* Aljos Farjon, Denis Filer, 2013-11-11 A 2014 Choice Magazine Outstanding Academic Title An Atlas of the World's Conifers is the first ever atlas of all known conifer species. It is based on locality information of ca 37 000 collected herbarium specimens held in scientific institutions. As well as providing natural distribution maps for each species, Farjon and Filer give the reader comprehensive insight into the biogeography, diversity, and conservation status of conifers on all continents, dispelling the widely held view that they are primarily a northern boreal plant group. Conifer diversity is analysed and presented with a taxonomic and geographic perspective. Distribution patterns are interpreted using the latest information on continental drift, dispersal, and phylogeny. The entire dataset supporting the Atlas can be consulted and verified online. These data can also be used for further research and are an invaluable resource for anyone working on conifer systematics, biogeography, or conservation. An Atlas of the World's Conifers indicates the known distribution of all conifers, including an analysis of their biogeography, diversity, and conservation status. Also available from Brill is Aljos Farjon's *A Handbook of the World's Conifers*, published in 2010, ISBN 978 90 04 17718 5, which is a 2017 Choice Magazine Outstanding Academic Title.

Lapland: A Natural History Derek Ratcliffe, 2010-06-30. This stunning new Poyser title looks at the flora and fauna of Lapland, that area of northern Europe and northwestern Russia which lies within the Arctic circle. After general introductions, the book examines the Lapland ecosystems and species by habitat type, with one chapter dealing with freshwater habitats, another with open tundra, and so on. The history of natural history study in the region and the conservation issues affecting it today are also discussed. The book is illustrated throughout with a wealth of the author's own colour photographs, and there are also some line drawings and a number of maps and other figures to illustrate key points. This is a wonderfully evocative book which creates a vivid sense of place for one of the planet's last wildernesses and will appeal to anyone who loves wildlife and wild places. A rare window onto one of Europe's most unspoiled areas by the outstanding British field naturalist of the late 20th century. The Independent. An informative and easy-to-read text on a part of the natural world unfamiliar to many. It is a fascinating, enjoyable book. Wildlife Activist, Summer 2006.
