Collinge, 2012-02-23 With about one billion members the Catholic Church is one of the world's largest religious bodies and its history is crucially linked to global events In the *Historical Dictionary of Catholicism* author William J Collinge provides the reader with a comprehensive introduction to the theology doctrines and worship of the religion He covers the entire Catholic tradition from the time of Jesus to the present including the periods before the present division of Christianity into Roman Catholic Eastern Orthodox and Protestant Collinge has also included entries on heretical schismatic and dissident movements within Catholicism and he covers the relation of Catholicism to other Christian traditions to the major non Christian religions and to Western cultural and philosophical traditions The second edition of the *Historical Dictionary of Catholicism* has been updated to reflect recent developments in the Catholic Church most notably the death of Pope John Paul II and his succession by Pope Benedict XVI An updated introduction precedes the main body of the dictionary which contains more than 500 alphabetical cross referenced entries covering persons organizations places events titles and concepts The entries are followed by several appendixes on popes ecumenical councils the documents of Vatican Council II major papal encyclicals and Catholic prayers and a comprehensive bibliography provides the researcher with further readings The second edition of the *Historical Dictionary of Catholicism* is an ideal access point for students researchers or anyone interested in the history of the Catholic Church **The Years of Jesuit Suppression, 1773-1814: Survival, Setbacks, and Transformation** Paul Shore, 2019-12-30 The forty one years between the Society of Jesus's papal suppression in 1773 and its eventual restoration in 1814 remain controversial with new research and interpretations continually appearing Shore's narrative approaches these years and the period preceding the suppression from a new perspective that covers individuals not usually discussed in works dealing with this topic As well as examining the contributions of former Jesuits to fields as diverse as ethnology a term and concept pioneered by an ex Jesuit and library science where Jesuits and ex Jesuits laid the groundwork for the great advances of the nineteenth century the essay also explores the period the exiled Society spent in the Russian Empire It concludes with a discussion of the Society's restoration in the broader context of world history **From Monophysitism to**

Nestorianism Theodore Sabo, 2018-04-18 The most important Christological controversies were waged during the Third through the Sixth Ecumenical Councils This book argues that each of these councils can be characterized by the labels Nestorian Monophysite or proto Monophysite In the Third and Fourth Councils a Nestorian or Antiochene victory followed a Monophysite one and the pattern was repeated identically with the Fifth and Sixth Councils If this seems to damage the religious interpretation of the councils as the slow hammering out of orthodoxy or to contradict the current interpretation of the councils it is not meant to In contrast to R V Sellers the distinctions between the Alexandrian and Antiochene approaches to Christology are maintained and each council is labeled as coming down on one or the other of the two sides The book s title reflects a half truth Orthodox Christology at least until the outbreak of the Iconoclastic crisis was characterized by a progression from the deifying and unifying impulse of the Alexandrian school in favor of the humanizing and dichotomizing tendency of the Antiochene However this book does not affirm anything other than that early orthodoxy successfully navigated the often narrow strait between Nestorianism and Monophysitism By continually changing sides and by declaring the decrees of all previous councils binding it found itself outwitting both the Monophysites and the Nestorians Members of the Gregorian Mission , **The Papacy in the Age of Totalitarianism, 1914-1958** John Francis Pollard, 2014 The Papacy in the Age of Totalitarianism 1914 1958 examines the most momentous years in papal history Popes Benedict XV 1914 1922 Pius XI 1922 1939 and Pius XII 1939 1958 faced the challenges of two world wars and the Cold War and threats posed by totalitarian dictatorships like Italian Fascism German National Socialism and Communism in Russia and China The wars imposed enormous strains upon the unity of Catholics and the hostility of the totalitarian regimes to Catholicism lead to the Church facing persecution and martyrdom on a scale similar to that experienced under the Roman Empire and following the French Revolution At the same time these were years of growth development and success for the papacy Benedict healed the wounds left by the modernist witch hunt of his predecessor and re established the papacy as an influence in international affairs through his peace diplomacy during the First World War Pius XI resolved the Roman Question with Italy and put papal finances on a sounder footing He also helped reconcile the Catholic Church and science by establishing the Pontifical Academy of Sciences and took the first steps to move the Church away from entrenched anti Semitism Pius XI continued his predecessor s policy of the indigenisation of the missionary churches in preparation for de colonisation Pius XII fully embraced the media and other means of publicity and with his infallible promulgation of the Assumption in 1950 he took papal absolutism and centralism to such heights that he has been called the last real pope Ironically he also prepared the way for the Second Vatican Council Our Dogs, Our Selves , 2016-09-12 The ubiquity of references to dogs in medieval and early modern texts and images must at some level reflect their actual presence in those worlds yet scholarly consideration of this material is rare and scattered across diverse sources This volume addresses that gap bringing together fifteen essays that examine the appearance meaning and significance of dogs in painting sculpture manuscripts literature and legal records

of the period reaching beyond Europe to include cultural material from medieval Japan and Islam While primarily art historical in focus the authors approach the subject from a range of disciplines and with varying methodology that ultimately reveals as much about dogs as about the societies in which they lived Contributors are Kathleen Ashley Jane Carroll Emily Cockayne John Block Friedman Karen M Gerhart Laura D Gelfand Craig A Gibson Walter S Gibson Nathan Hofer Jane C Long Judith W Mann Sophie Oosterwijk Elizabeth Carson Pastan Donna L Sadler Alexa Sand and Janet Snyder **Monthly**
