Advanced Life Support Course Manual:

Clinical Nursing Practices E-Book Elizabeth Jamieson, Janice M. McCall, Lesley A. Whyte, 2007-04-05 This title is directed primarily towards health care professionals outside of the United States It is a well known text that provides guidelines for over 40 common nursing procedures carried out by carers in a variety of settings The development of competence in these practices is one of the most important aspects of pre registration programmes and this is one of the few UK based texts that takes an educational approach to these practices as opposed to a purely procedure driven approach As in previous editions the emphasis is on a holistic approach with the recognition that each patient is a unique individual Each procedure contains rationale and information for patient education in addition to step by step guidance Skills explained step by step to facilitate learning The comprehensive range of procedures including advanced practices will give readers confidence when they begin clinical work Relevance to hospital and community settings makes it applicable to a wide audience The rationale sections link to the evidence base thereby ensuring best practice

Paediatric Advanced Life Support Philip Jevon, 2012-03-20 In the event of a paediatric cardiac arrest it is essential to be able to respond rapidly providing safe and effective care The second edition of this successful text provides nurses with a practical and systematic guide to the rapid assessment and delivery of appropriate resuscitation to infants and children Conforms to current European Resuscitation Council Guidelines Based on up to date research and evidence based practice protocols Synoptic approach enables rapid delivery of effective treatment Written by experts in the field of both resuscitation and paediatrics Paediatric Advanced Life Support is a succinct yet comprehensive guide and is an essential purchase for any health professional likely to encounter an emergency situation
