Prosumers such as energy storage smart home and microgrids are the consumers who also produce and share surplus energy with other users With capabilities of flexibly managing the generation storage and consumption of energy in a simultaneous manner prosumers can help improve the operation efficiency of smart grid Due to the rapid expansion of prosumer clusters the planning and operation issues of prosumer energy systems have been increasingly raised Aspects including energy infrastructure design energy management system stability etc are urgently required to be addressed while taking full advantage of prosumers capabilities However up to date the research on prosumers has not drawn sufficient attention This proposal presents the need to introduce a Research Topic on prosumer energy systems in Frontiers in Energy Research We believe this Research Topic can promote the research on advanced planning and operation technologies of prosumer energy systems and contribute to the carbon neutrality for a sustainable society
