Michael Lindell

A New Species Of Trouble The Human Experience Of Modern Disasters:

A New Species of Trouble Kai Erikson, 1995 In the twentieth century disasters caused by human beings have become more and more common Unlike earthquakes and other natural catastrophes this new species of trouble afflicts person and groups in particularly disruptive ways A New Species of Trouble, 1995 *Trauma, Culture, and PTSD* C. Fred Alford, 2016-06-09 This book examines the social contexts in which trauma is created by those who study it whether considering the way in which trauma afflicts groups cultures and nations or the way in which trauma is transmitted down the generations As Alford argues ours has been called an age of trauma Yet neither trauma nor post traumatic stress disorder PTSD are scientific concepts Trauma has been around forever even if it was not called that PTSD is the creation of a group of Vietnam veterans and psychiatrists designed to help explain the veterans suffering This does not detract from the value of PTSD but sets its historical and social context The author also confronts the attempt to study trauma scientifically exploring the use of technologies such as magnetic resonance imagining MRI Alford concludes that the scientific study of trauma often reflects a willed ignorance of traumatic experience In the end trauma is about suffering **Trauma and Forgiveness** C. Fred Alford, 2014-01-09 Contrary to the view of trauma popularized by literary theorists Trauma and Forgiveness argues that the traumatized are capable of representing their experience and that we should therefore listen more and theorize less Using stories and case studies including testimonies from Holocaust survivors as well as the victims of ordinary trauma C Fred Alford shows that while the traumatized are generally capable of representing their experience this does little to heal them He draws on the British Object Relations tradition in psychoanalysis to argue that forgiveness which might be expected to help heal the traumatized is generally an attempt to avoid the hard work of mourning losses that can never be made whole Forgiveness is better seen as a virtue in the classical sense a recognition of human vulnerability The book concludes with an extended case study of the essayist Jean Am ry and his refusal to forgive The Angry Earth Anthony Oliver-Smith, Susanna Hoffman, Susanna M. Hoffman, 2019-12-06 The Angry Earth explores how various cultures in different historical moments have responded to calamity offering insight into the complex relationship between societies and their environments From hurricanes floods and earthquakes to oil spills and nuclear accidents disasters triggered by both natural and technological hazards have become increasingly frequent and destructive across the planet Through case studies drawn from around the globe the contributors to this volume examine issues ranging from the social and political factors that set the stage for disaster to the cultural processes experienced by survivors to the long term impact of disasters on culture and society In the second edition each chapter has been updated with a postscript to reflect on recent developments in the field There is also new material on key present day topics including epidemics drought non governmental organizations and displacement and resettlement This book demonstrates the relevance of studying disaster from an anthropological perspective and is a valuable resource not only for anthropologists but for other fields concerned with education policy and practice **Black Beaches**

and Bayous Lisa A. Eargle, Ashraf Esmail, 2012-11-02 Black Beaches and Bayous The BP Deepwater Horizon Oil Spill Disaster provides a multidisciplinary international perspective on one of the major disaster events within the United States during the last ten years Scholars from various disciplines including sociology political science ecology psychology and criminal justice investigate the different components and issues associated with this event The contributors address topics such as the social and historical context of fossil fuel use steps within the technological disaster process and similarities and differences between this disaster and other technological disasters They also discuss the social and psychological impacts on Gulf Coast residents the transformation of natural ecological systems changes in risk assessment and media portrayals of the Obama administration and its response to this disaster

Next Year in Jerusalem Leonard J. Greenspoon, 2019-10-15 Next Year in Jerusalem recognizes that Jews have often experienced or imaged periods of exile and return in their long tradition The fourteen papers in this collection examine this phenomenon from different approaches genres and media They cover the period from biblical times through today Among the exiles highlighted are the Babylonian Exile sixth century BCE the exile after the destruction of the Jerusalem Temple 70 CE and the years after the Crusaders tenth century CE Events of return include the aftermath of the Babylonian Exile fifth century BCE the centuries after the Temple s destruction first and second CE and the years of the establishment of the modern State of Israel 1948 CE In each instance authors pay close attention to the historical settings the literature created by Jews and others and the theological explanations offered typically this was seen as divine punishment or reward for Israel s behavior The entire volume is written authoritatively and accessibly

Art Therapy in Response to Natural Disasters, Mass Violence, and Crises Joseph Scarce, 2021-12-21 With contributions from a range of expert voices within the field this book explores the use of art therapy as a response to traumatic events Offering rare insight into ways in which art therapists have responded to recent crises this is a unique resource for art therapists looking to coordinate interventions for large scale disaster and resulting trauma Chapters address a range of environmental and manmade disasters around the world including hurricanes typhoons wildfires mass shootings and forced migration highlighting the impact of an art therapy approach in dealing with widespread trauma Covering both community and individual cases it provides an in depth view into the challenges of working in these settings including the effects on the therapist themselves and offers practical information on how to coordinate fund and maintain responses in these environments The first book to focus on disaster response in art therapy this will be an invaluable contribution to the field in an increasingly vital area
