A Prehistory Of The North Human Settlement Of The Higher Latitudes:

A Prehistory of the North John F. Hoffecker, 2005 Annotation Early humans did not drift north from Africa as their ability to cope with cooler climates evolved Settlement of Europe and northern Asia occurred in relatively rapid bursts of expansion This study tells the complex story spanning almost two million years of how humans inhabited some of the coldest places on earth

Emergence and Diversity of Modern Human Behavior in Paleolithic Asia Yousuke Kaifu, Masami Izuhara, Ted Goebel, Hiroyuki Sato, Akira Ono, 2015-02-15 Despite the obvious geographic importance of eastern Asia in human migration its discussion in the context of the emergence and dispersal of modern humans has been rare Emergence and Diversity of Modern Human Behavior in Paleolithic Asia focuses long overdue scholarly attention on this under studied area of the world Arising from a 2011 symposium sponsored by the National Museum of Nature and Science in Tokyo this book gathers the work of archaeologists from the Pacific Rim of Asia Australia and North America to address the relative lack of attention given to the emergence of modern human behavior as manifested in Asia during the worldwide dispersal from Africa

Extreme Conservation Joel Berger, 2018-08-02 Extraordinary Berger is a hero of biology who deserves the highest honors that science can bestow Tim Flannery New York Review of Books On the Tibetan Plateau there are wild yaks with blood cells thinner than those of horses by half enabling the endangered yaks to survive at 40 below zero and in the lowest oxygen levels of the mountaintops But climate change is causing the snow patterns here to shift and with the snows the entire ecosystem Food and water are vaporizing in this warming environment and these beasts of ice and thin air are extraordinarily ill equipped for the change A journey into some of the most forbidding landscapes on earth Joel Berger's *Extreme Conservation* is an eye opening steady look at what it takes for animals like these to live at the edges of existence But more than this it is a revealing exploration of how climate change and people are affecting even the most far flung niches of our planet Berger's quest to understand these creatures struggles takes him to some of the most remote corners and peaks of the globe across Arctic tundra and the frozen Chukchi Sea to study muskoxen into the Bhutanese Himalayas to follow the rarely sighted takin and through the Gobi Desert to track the proboscis swinging saiga Known as much for his rigorous scientific methods of developing solutions to conservation challenges as for his penchant for donning moose and polar bear costumes to understand the mindsets of his subjects more closely Berger is a guide par excellence He is a scientist and storyteller who has made his life working with desert nomads in zones that typically require Sherpas and oxygen canisters Recounting animals as charismatic as their landscapes are extreme Berger's unforgettable tale carries us with humor and expertise to the ends of the earth and back But as his adventures show the more adapted a species has become to its particular ecological niche the more devastating climate change can be Life at the extremes is more challenging than ever and the need for action for solutions has never been greater

New Perspectives on People and Forests Eva Ritter, Dainis Dauksta, 2011-04-29 The aim of this book is to elucidate the role of forests as part of a landscape in the life of

people Most landscapes today are cultural landscapes that are influenced by human activity and that in turn have a profound effect on our understanding of and identification with a place The book proposes that a better understanding of the bond between people and forests as integrated part of a landscape may be helpful in landscape planning and may contribute to the discussion of changes in forest cover which has been motivated by land use changes rural development and the global climate debate To this end people s perception of forest landscapes the reasons for different perceptions and future perspectives are discussed Given the wide range of forest landscapes and cultural perspectives which exist across the world the book focuses on Europe as a test case to explore the various relationships between society culture forests and landscapes It looks at historical evidence of the impacts of people on forests and vice versa explores the current factors affecting people s physical and emotional comfort in forest landscapes and looks ahead to how changes in forest cover may alter the present relationships of people to forests Drawing together a diverse literature and combining the expertise of natural and social scientists this book will form a valuable reference for students and researchers working in the fields of landscape ecology and landscape architecture geography social science environmental psychology environmental history It will also be of interest to researchers government agencies and practitioners with an interest in issues such as sustainable forest management sustainable tourism reserve management urban planning and environmental interpretation

Health Transitions in Arctic Populations Peter Bjerregaard,T. Kue Young,2008-06-28 The Arctic regions are inhabited by diverse populations both indigenous and non indigenous *Health Transitions in Arctic Populations* describes and explains changing health patterns in these areas how particular patterns

came about and what can be done to improve the health of Arctic peoples This study correlates changes in health status with major environmental social economic and political changes in the Arctic T Kue Young and Peter Bjerregaard seek commonalities in the experiences of different peoples while recognizing their considerable diversity They focus on five Arctic regions Greenland Northern Canada Alaska Arctic Russia and Northern Fennoscandia offering a general overview of the geography history economy population characteristics health status and health services of each The discussion moves on to specific indigenous populations Inuit Dene and Sami major health determinants and outcomes and finally an integrative examination of what can be done to improve the health of circumpolar peoples Health Transitions in Arctic Populations offers both an examination of key health issues in the north and a vision for the future of Arctic inhabitants *The Canadian Environment in Political Context* Andrea Olive,2015-12-21

Ki'ti's Story, 75,000 BC Bonnye Matthews,2012-11-30 What author Bonnye Mathews has managed to do is to expertly craft a series of notably entertaining novels that incorporates new data into an historical fictional accounts that bring these ancient peoples alive Midwest Book Review Ki ti s Story is a coming of age story of a girl predestined to lead her people It is the tale of how three different groups of people Neanderthals Cro magnons and Homo erectus meet and become the People The story begins as they race to avoid the ashfall from a supervolcano which is modeled on the eruption of Mt Toba Come walk with Neanderthals and explore a different time and place Meet Wamumur the Wise One who recaptures love and learns a little too late that he pushes too hard as a teacher as did his father before him Totamu the administrative head of the People whose officious behaviors are accepted often with irritation but with the realization that she works for the good of the People Ki ti the child whose childhood is cut short because she has been gifted with memory of the stories of the People who is wise beyond her years in some respects and ignorant and willful in others Nanichak na the individual recognized for hunter leadership who would be chief if they had one The story is based on substantial research much of which occurred in the last fifteen to twenty years Ki ti s Story 75 000 BC provides an opportunity to explore a unique view of Neanderthal life based on recent science For example it is now accepted that Neanderthals had fair skin some had red hair and blue eyes and they could speak as well as we can They were intellectually bright were able to catch dolphins something that cannot be done from shore could kill megafauna for food with spears and survive cold temperatures and hostile environments that would challenge our best survivalists They also created art buried their dead with red ocher and or flowers and cared for their disabled Ki ti s Story 75 000 BC is Book One in the Winds of Change a prehistoric fiction series on the peopling of the Americas Bonnye Matthews is America s preeminent writer of prehistoric history Grace Cavellieri of The Poet and the Poem from the Library of Congress [Nature and Culture](#) Sarah Pilgrim,Jules N. Pretty,2010-09-23 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond

divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity

A Short History of Finland Jonathan Clements, 2023-02-02 A fascinating history of Finland from prehistoric times to the twenty first century The modern nation of Finland is the heir to centuries of history as a wilderness at the edge of early Europe a borderland of the Swedish empire and a Grand Duchy of tsarist Russia And as Jonathan Clements s vivid concise volume shows it is a tale paved with oddities and excitements galore from prehistoric reindeer herders to medieval barons Christian martyrs to Viking queens and in the twentieth century the war heroes who held off the Soviet Union against impossible odds Offering accounts of public artworks literary giants legends folktales and famous figures Clements provides an indispensable portrait of this fascinating nation This updated edition includes expanded coverage on the Second World War as well as new sections on Finns in America and Russia the centenary of the republic and Finland s battle with COVID 19 right up to its historic application to join NATO
