A RIVER

A photograph of a large concrete dam, likely the Glen Canyon Dam, with water behind it and a city in the distance. The dam is a massive concrete structure with a series of buttresses. The water is a deep blue, and the city in the background is visible on a hillside. The sky is a clear, bright blue.

A River No More The Colorado River And The West:

A River No More Philip L. Fradkin, 1996-09-30 Here is the definitive history of the development of the Colorado River and the claims made on its waters from its source in the Wyoming Rockies to the California and Arizona borders where so saline it kills plants it peters out just short of the Gulf of California Ever increasing demands on the river to supply cities in the desert render this new edition all too timely Philip Fradkin has updated this valuable book with a new preface Restoring Colorado River Ecosystems Robert W. Adler, 2012-06-22 Over the past century humans have molded the Colorado River to serve their own needs resulting in significant impacts to the river and its ecosystems Today many scientists public officials and citizens hope to restore some of the lost resources in portions of the river and its surrounding lands Environmental restoration on the scale of the Colorado River basin is immensely challenging in addition to an almost overwhelming array of technical difficulties it is fraught with perplexing questions about the appropriate goals of restoration and the extent to which environmental restoration must be balanced against environmental changes designed to promote and sustain human economic development Restoring Colorado River Ecosystems explores the many questions and challenges surrounding the issue of large scale restoration of the Colorado River basin and of large scale restoration in general Robert W Adler evaluates the relationships among the laws policies and institutions governing use and management of the Colorado River for human benefit and those designed to protect and restore the river and its environment He examines and critiques the often challenging interactions among law science economics and politics within which restoration efforts must operate Ultimately he suggests that a broad concept of restoration is needed to navigate those uncertain waters and to strike an appropriate balance between human and environmental needs While the book is primarily about restoration of Colorado River ecosystems it is also about uncertainty conflict competing values and the nature pace and implications of environmental change It is about our place in the natural environment and whether there are limits to that presence we ought to respect And it is about our responsibility to the ecosystems we live in and use *Across This Land* John C.
