A New Theory Of Urban Design

Hossein Bahrainy, Ameneh Bakhtiar

A New Theory Of Urban Design:

A New Theory of Urban Design Christopher Alexander, 1987 The venerable cities of the past such as Venice or Amsterdam convey a feeling of wholeness an organic unity that surfaces in every detail large and small in restaurants shops public gardens even in balconies and ornaments But this sense of wholeness is lacking in modern urban design with architects absorbed in problems of individual structures and city planners preoccupied with local ordinances it is almost impossible to achieve In this groundbreaking volume the newest in a highly acclaimed series by the Center for Environmental Structure architect and planner Christopher Alexander presents a new theory of urban design which attempts to recapture the process by which cities develop organically To discover the kinds of laws needed to create a growing whole in a city Alexander proposes here a preliminary set of seven rules which embody the process at a practical level and which are consistent with the day to day demands of urban development He then puts these rules to the test setting out with a number of his graduate students to simulate the urban redesign of a high density part of San Francisco initiating a project that encompassed some ninety different design problems including warehouses hotels fishing piers a music hall and a public square This extensive experiment is documented project by project with detailed discussion of how each project satisfied the seven rules accompanied by floorplans elevations street grids axonometric diagrams and photographs of the scaled down model which clearly illustrate the discussion A New Theory of Urban Design provides an entirely new theoretical framework for the discussion of urban problems one that goes far to remedy the defects which cities have today **Toward an**

Integrative Theory of Urban Design Hossein Bahraoui, Ameneh Bakhtiar, 2016-05-13 This book takes a bold epistemological approach to address the fundamental questions that urban design has faced since its inception questions concerning its legitimacy definition nature content purpose theory methods jurisdiction and above all its knowledge base The appropriate level of urban design global or local is another critical and emerging question discussed At the end an integrative theory of urban design is introduced on the basis of which a set of principles is developed for application by practicing urban designers These principles are presented at three essential levels general global and local Iranian Toward an Integrative Theory of Urban Design is intended to dispel many of the ambiguities still troubling urban design as a discipline and profession **A New Theory of Urban Design and Responsive Environments** Beena R. Mukkamala, 1997 **Theory of**

Urban Space Development Jin Duan, 2024-08-29 This book is a systematic monograph on urban space development theory exploring the laws of urban space development and the basic principles of planning and design It clarifies the connotation and methods of urban space development research highlights the deep structure and four laws of urban space development expounds the obvious characteristics of urban and regional forms and discusses the interventional role of urban planning and the development mode of Chinese urban space It also discusses the methodological change of modern urban design and forms the principles and core content of China's national spatial planning Guided by the fundamental principles and methods

of development theory this book follows logical progression from concept to method from deep structure to manifest form from macro to micro and from law to planning By providing readers with a comprehensive and systematic urban space development research system this book is a valuable read for both researchers and graduate students in urban studies and architectural design The translation was done with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

The Form of Cities Alexander R. Cuthbert, 2008-04-15 The Form of Cities offers readers a considered theoretical introduction to the art of designing cities Demonstrates that cities are replete with symbolic values collective memory association and conflict Proposes a new theoretical understanding of urban design based in political economy Demonstrates different ways of conceptualising the city whether through aesthetics or the prism of gender for example Written in an engaging and jargon free style but retains a sophisticated interpretative edge Complements Designing Cities by the same author Blackwell 2003

Building A Revolution Charlie Q.L. Xue, 2005-09-01 Building a Revolution Chinese Architecture Since 1980 presents a picture of Chinese architecture in transition as the entire economy shifted from being planned and state controlled to being market led The book also examines the national form and Chinese identity the impact of international architecture housing reform and the emergence of architects in private practice Both celebrated and young Chinese architects are portrayed and the notable buildings in the prosperous coastal cities are highlighted Through this book on modern Chinese architecture the reader will appreciate the influence of globalization and modernization on the most populous country in the world

Urban Design Cliff Moughtin, 2003 Dealing with a wide range of techniques used in the urban design process this book is invaluable for architecture planning landscape and surveying students and will also help professionals in day to day practice The latest techniques are included in this edition

Sustainable Urban Neighbourhood David Rudlin, Nicholas Falk, 2010-05-14 This successful title previously known as Building the 21st Century Home and now in its second edition explores and explains the trends and issues that underlie the renaissance of UK towns and cities and describes the sustainable urban neighbourhood as a model for rebuilding urban areas The book reviews the way that planning policies architectural trends and economic forces have undermined the viability of urban areas in Britain since the Industrial Revolution Now that much post war planning philosophy is being discredited we are left with few urban models other than garden city inspired suburbia Are these appropriate in the 21st century given environmental concerns demographic change social and economic pressures The authors suggest that these trends point to a very different urban future The authors argue that we must reform our towns and cities so that they become attractive humane places where people will choose to live The Sustainable Urban Neighbourhood is a model for such reform and the book describes what this would look like and how it might be brought about

Chinese Urban Design Fei Chen, Kevin Thwaites, 2018-01-12 The traditional Chinese city is undergoing an identity crisis With the rapid development taking place there is growing conflict between this new building and the existing urban heritage An appropriate approach both in design and in legislation is

urgently needed to deal with this problem Furthermore although Chinese cities have a remarkably long history existing methods of urban form study in China are either descriptive or loosely structured whereas a comprehensive methodology is necessary to read Chinese urban forms in a consistent way and thus inform designers and policy makers Chinese Urban Design targets these problems and offers an analytic and conceptual framework for both urban investigation and consequent design Firstly summarising traditional urban design principles and how Chinese cities have transformed over time it then introduces and offers a theoretic ground and scientific methodology for understanding the evolution of urban forms initially developed in western countries It demonstrates the theoretic model via real cases from the city of Nanjing and establishes a direct link between understanding of urban forms and design development By providing a cross cultural investigation on the theories and methods of urban typology and morphology this book aims to suggest best future practice for urban design in China It explores how urban designers and local policy makers can produce culturally responsive designs and how they might better understand the formation and transformation of the built environment in which their creations sit It also looks at how local residents lifestyle culture and demands might be reflected and respected in design process

The Routledge Companion to Twentieth and Early Twenty-First Century Urban Design Jon Lang, 2020-11-09 The Routledge Companion to Twentieth and Early Twenty First Century Urban Design is a fully illustrated descriptive and explanatory history of the development of urban design ideas and paradigms of the past 150 years The ideas and projects hypothetical and built range in scale from the city to the urban block level The focus is on where the generic ideas originated the projects that were designed following their precepts the functions they address and or afford and what we can learn from them The morphology of a city its built environment evolves unselfconsciously as private and governmental investors self consciously erect buildings and infrastructure in a pragmatic piecemeal manner to meet their own ends Philosophers novelists architects and social scientists have produced myriad ideas about the nature of the built environment that they consider to be superior to those forms resulting from a laissez faire attitude to urban development Rationalist theorists dream of ideal futures based on assumptions about what is good empiricists draw inspirations from what they perceive to be working well in existing situations Both groups have presented their advocacies in manifestoes and often in the form of generic solutions or illustrative designs This book traces the history of these ideas and will become a standard reference for scholars and students interested in the history of urban spaces including architects planners urban historians urban geographers and urban morphologists
