A New View From The Zoo:

Mediating Nature Nils Lindahl Elliot, 2013-04-15 *Mediating Nature* provides a history of the present nature of mass mediation It examines the ways in which a number of discourses technologies and institutions have historically shaped the current ways of imagining nature in the mass media Where much of the existing research treats mass mediation as a matter of media technologies texts or institutions this text adopts a somewhat different approach it considers mass mediation as a historical process by means of which the members of audiences and indeed the public more generally came to be incorporated as observers in and of mass culture This approach allows the book to investigate the roles that a wide range of genres relating to nature played in constructing senses of nature but also of mass culture itself The genres include landscape paintings and gardens modern zoos photography early cinema nature essays disaster and animal attack films as well as wildlife documentaries on television The investigation develops what Lindahl Elliot describes as a social semeiotic approach that combines the semeiotic theory of Charles Peirce with a historical sociology of cultural formations Topical and timely this fascinating book will be of great interest to students and researchers in the fields of media sociology cultural geography and environmental studies **New Views on Old News** Merritt Abrash, 2014-05-08 The objective of the seven articles reprinted in *New Views on Old News* is to promote reconsideration of longstanding assumptions about a variety of significant creative

works The hope of author Merritt Abrash is that readers will find Thomas Mores Utopians H G Wells time traveler Karel Capek robots Alfred Hitchcocks birds and the other subjects of the book no longer appearing quite the same as widely understood It is not a matter of previous interpretations being in any way wrong rather the general point of the articles is that in regard to the works they discuss exactly the same evidence can if viewed from different angles lead to different conclusions claiming equal validity The long short story A Question of Code which begins New Views on Old News stands apart from the seven articles in that it presents a new view regarding which virtually no old news exists to be reconsidered The only longstanding assumption about its subject matter retribution for the Holocaust could be said to be that in the first place the latter defies any form of plausible creative handling at all Instead of comparing the validity of different interpretations each reader of this story must come to his or her own unaided conclusion about the merit of the Majors design very much as does the narrator in the story Aside from any other virtues or lack of same New Views on Old News should open up for readers fresh avenues toward understandings just as compiling its various parts did for the author

A New History of Life Peter Ward, Joe Kirschvink, 2015-04-07 The history of life on Earth is in some form or another known to us all or so we think A New History of Life offers a provocative new account based on the latest scientific research of how life on our planet evolved the first major new synthesis for general readers in two decades Charles Darwin's theories first published more than 150 years ago form the backbone of how we understand the history of the Earth In reality the currently accepted history of life on Earth is so flawed so out of date that it's past time we need a New History of Life In their latest book Joe Kirschvink and Peter Ward will show that many of our most cherished beliefs about the evolution of life are wrong Gathering and analyzing years of discoveries and research not yet widely known to the public A New History of Life proposes a different origin of species than the one Darwin proposed one which includes eight foot long centipedes a frozen snowball Earth and the seeds for life originating on Mars Drawing on their years of experience in paleontology biology chemistry and astrobiology experts Ward and Kirschvink paint a picture of the origins life on Earth that are at once too fabulous to imagine and too familiar to dismiss and looking forward A New History of Life brilliantly assembles insights from some of the latest scientific research to understand how life on Earth can and might evolve far into the future
