A Practical Guide To Singapore Data Protection Law:

A Practical Guide to Singapore Data Protection Law Winnie Chang, 2013 **Data Protection Law in Singapore** Simon Chesterman, 2014-01-15 The adoption of the Personal Data Protection Act has transformed the legal regime for data protection in Singapore This book explains the history and evolution of data protection in Singapore highlights issues that will need to be worked out in practice as the new law is implemented and derives lessons that may be taken from other countries in the region and beyond Bringing together leading scholars and practitioners in the field the book will be of interest to the academic legal and business communities Key questions considered in the book include how to reconcile notions of privacy in an information age and how national laws can regulate an increasingly interconnected world **Data Protection Law** Robert Walters, Leon Trakman, Bruno Zeller, 2019-09-04 This book provides a comparison and practical guide for academics students and the business community of the current data protection laws in selected Asia Pacific countries Australia India Indonesia Japan Malaysia Singapore Thailand and the European Union The book shows how over the past three decades the range of economic political and social activities that have moved to the internet has increased significantly This technological transformation has resulted in the collection of personal data its use and storage across international boundaries at a rate that governments have been unable to keep pace The book highlights challenges and potential solutions related to data protection issues arising from cross border problems in which personal data is being considered as intellectual property within transnational contracts and in anti trust law The book also discusses the emerging challenges in protecting personal data and promoting cyber security The book provides a deeper understanding of the legal risks and frameworks associated with data protection law for local regional and global academics students businesses industries legal profession and individuals **Data Protection in the Internet** Dário Moura Vicente, Sofia de Vasconcelos Casimiro, 2019-12-01 This book identifies and explains the different national approaches to data protection the legal regulation of the collection storage transmission and use of information concerning identified or identifiable individuals and determines the extent to which they could be harmonised in the foreseeable future In recent years data protection has become a major concern in many countries as well as at supranational and international levels In fact the emergence of computing technologies that allow lower cost processing of increasing amounts of information associated with the advent and exponential use of the Internet and other communication networks and the widespread liberalization of the trans border flow of information have enabled the large scale collection and processing of personal data not only for scientific or commercial uses but also for political uses A growing number of governmental and private organizations now possess and use data processing in order to determine predict and influence individual behavior in all fields of human activity This inevitably entails new risks from the perspective of individual privacy but also other fundamental rights such as the right not to be discriminated against fair competition between commercial enterprises and the proper functioning of democratic institutions

These phenomena have not been ignored from a legal point of view at the national supranational and international levels an increasing number of regulatory instruments including the European Union's General Data Protection Regulation applicable as of 25 May 2018 have been adopted with the purpose of preventing personal data misuse Nevertheless distinct national approaches still prevail in this domain notably those that separate the comprehensive and detailed protective rules adopted in Europe since the 1995 Directive on the processing of personal data from the more fragmented and liberal attitude of American courts and legislators in this respect In a globalized world in which personal data can instantly circulate and be used simultaneously in communications networks that are ubiquitous by nature these different national and regional approaches are a major source of legal conflict

Privacy and Personal Data Protection Law in Asia Adrian Mak, Ching Him Ho, Anselmo Reyes, 2024-12-12 Covering 16 Asian jurisdictions representing differing stages in the development of data protection regulatory systems this book offers an in depth cross jurisdictional commentary on the developing world of Asian privacy and personal data protection with a special focus on private international law issues It brings together an international team of contributors who reflect on the framework of data privacy and protection laws in their respective regions Topics discussed range from the extent to which such laws may have extraterritorial effect or may conflict with the laws of other states to shortcomings of existing systems and their potential for improvement More than a valuable contribution to comparative private conflict of laws literature from an Asian perspective the book also considers possible future trajectories for existing laws It covers the extent to which Asian regimes will inevitably need to integrate with ever evolving privacy and personal data protection initiatives in the EU the USA and China It also assesses the extent to which existing regimes are sufficiently robust to handle the challenges of future technical developments in data collection and data transfer across borders especially in relation to the activities of giant corporations such as Meta Facebook Google Amazon Alibaba and Tencent The result is a wide ranging and forward thinking resource which provides practitioners and researchers with an account of data privacy law and personal data protection laws in Asia and their cross border implications as those regulations are now and as they might be in the future
