

Advanced Transport Phenomena Load Solution Manual

18. From 1975, increasing studies in laboratory animals have demonstrated pharmacologic basis evidence suggesting trends that will likely give strongly suggestive (but not fully conclusive) evidence that, as currently known, several potential pathways of exposure to dieldrin through food of animals may exist (e.g., dairy, and meat). However, additional data from laboratory animals and from field studies are needed to establish the relative importance of these pathways.

This study was not designed to explore binary, black-white, ethnic differences in adolescent development phenomena and outcomes amongst high- and low-risk or minority youth. It is also important to note that although ethnic youth are over-represented in these adolescent outcomes, phenomena and important questions at issue in the current longitudinal studies have not necessarily been an the subject of differential ethnic comparisons.
