Inderjeet Mani, Mark T. Maybury, 1999 Natural Language Processing for Online Applications Peter Jackson, Isabelle Moulinier, 2007 This text covers the technologies of document retrieval information extraction and text categorization in a way which highlights commonalities in terms of both general principles and practical concerns It assumes some mathematical background on the part of the reader but the chapters typically begin with a non mathematical account of the key issues Current research topics are covered only to the extent that they are informing current applications detailed coverage of longer term research and more theoretical treatments should be sought elsewhere There are many pointers at the ends of the chapters that the reader can follow to explore the literature However the book does maintain a strong emphasis on evaluation in every chapter both in terms of methodology and the results of controlled experimentation

Information Retrieval Technology Sung Hyon Myaeng, Ming Zhou, Kam-Fai Wong, Hong-Jiang Zhang, 2007-05-25 The Asia Information Retrieval Symposium AIRS was established by the Asian information retrieval community after the successful series of Information retrieval with Asian Languages IRAL workshops held in six different locations in Asia starting from 1996 While the IRAL workshops had their focus on information retrieval problems involving Asian languages AIRS covers a wider scope of applications systems technologies and theory aspects of information retrieval in text audio image video and

multimedia data This extension of the scope reflects and fosters increasing research activities in information retrieval in this region and the growing need for collaborations across subdisciplines We are very pleased to report that we saw a sharp increase in the number of submissions and their quality compared to the IRAL workshops We received 106 papers from nine countries in Asia and North America from which 28 papers 26% were presented in oral sessions and 38 papers in poster sessions 36% It was a great challenge for the Program Committee to select the best among the excellent papers The low acceptance rates witness the success of this year's conference After a long discussion between the AIRS 2004 Steering Committee and Springer the publisher agreed to publish our proceedings in the Lecture Notes in Computer Science LNCS series which is SCI indexed We feel that this strongly attests to the excellent quality of the papers Proceedings of the Tenth International Symposium on Applied Electromagnetic and Mechanics T. Takagi, 2003 This publication covers topics in the area of applied electromagnetics and mechanics Since starting in Japan in 1988 the ISEM has become a well known international forum on applied electromagnetics *Concise Encyclopedia of Semantics* Keith Allan, 2010-04-06 Concise Encyclopedia of Semantics is a comprehensive new reference work aiming to systematically describe all aspects of the study of meaning in language It synthesizes in one volume the latest scholarly positions on the construction interpretation clarification obscurity illustration amplification simplification negotiation contradiction contraction and paraphrasing of meaning and the various concepts analyses methodologies and technologies that underpin their study It examines not only semantics but the impact of semantic study on related fields such as morphology syntax and typologically oriented studies such as grammatical semantics where semantics has made a considerable contribution to our understanding of verbal categories like tense or aspect nominal categories like case or possession clausal categories like causatives comparatives or conditionals and discourse phenomena like reference and anaphora COSE also examines lexical semantics and its relation to syntax pragmatics and cognitive linguistics and the study of how logical semantics develops and thrives often in interaction with computational linguistics As a derivative volume from Encyclopedia of Language and Linguistics Second Edition it comprises contributions from 150 of the foremost scholars of semantics in their various specializations and draws on 20 years of development in the parent work in a compact and affordable format Principally intended for tertiary level inquiry and research this will be invaluable as a reference work for undergraduate and postgraduate students as well as academics inquiring into the study of meaning and meaning relations within languages As semantics is a centrally important and inherently cross cutting area within linguistics it will therefore be relevant not just for semantics specialists but for most linguistic audiences The first encyclopedia ever published in this fascinating and diverse field Combines the talents of the world's leading semantics specialists The latest trends in the field authoritatively reviewed and interpreted in context of related disciplines Drawn from the richest most authoritative comprehensive and internationally acclaimed reference resource in the linguistics area Compact and affordable single volume reference format *Evaluating Information Retrieval*

and Access Tasks Tetsuya Sakai, Douglas W. Oard, Noriko Kando, 2020-09-01 This open access book summarizes the first two decades of the NII Testbeds and Community for Information access Research NTCIR NTCIR is a series of evaluation forums run by a global team of researchers and hosted by the National Institute of Informatics NII Japan The book is unique in that it discusses not just what was done at NTCIR but also how it was done and the impact it has achieved For example in some chapters the reader sees the early seeds of what eventually grew to be the search engines that provide access to content on the World Wide Web today s smartphones that can tailor what they show to the needs of their owners and the smart speakers that enrich our lives at home and on the move We also get glimpses into how new search engines can be built for mathematical formulae or for the digital record of a lived human life Key to the success of the NTCIR endeavor was early recognition that information access research is an empirical discipline and that evaluation therefore lay at the core of the enterprise Evaluation is thus at the heart of each chapter in this book They show for example how the recognition that some documents are more important than others has shaped thinking about evaluation design The thirty three contributors to this volume speak for the many hundreds of researchers from dozens of countries around the world who together shaped NTCIR as organizers and participants This book is suitable for researchers practitioners and students anyone who wants to learn about past and present evaluation efforts in information retrieval information access and natural language processing as well as those who want to participate in an evaluation task or even to design and organize one *Handbook of Intelligent Computing and Optimization for Sustainable Development* Mukhdeep Singh Manshahia, Valeriy Kharchenko, Elias Munapo, J. Joshua Thomas, Pandian Vasant, 2022-03-15 HANDBOOK OF INTELLIGENT COMPUTING AND OPTIMIZATION FOR SUSTAINABLE DEVELOPMENT This book provides a comprehensive overview of the latest breakthroughs and recent progress in sustainable intelligent computing technologies applications and optimization techniques across various industries Optimization has received enormous attention along with the rapidly increasing use of communication technology and the development of user friendly software and artificial intelligence In almost all human activities there is a desire to deliver the highest possible results with the least amount of effort Moreover optimization is a very well known area with a vast number of applications from route finding problems to medical treatment construction finance accounting engineering and maintenance schedules in plants As far as optimization of real world problems is concerned understanding the nature of the problem and grouping it in a proper class may help the designer employ proper techniques which can solve the problem efficiently Many intelligent optimization techniques can find optimal solutions without the use of objective function and are less prone to local conditions The 41 chapters comprising the Handbook of Intelligent Computing and Optimization for Sustainable Development by subject specialists represent diverse disciplines such as mathematics and computer science electrical and electronics engineering neuroscience and cognitive sciences medicine and social sciences and provide the reader with an integrated understanding of the importance that intelligent computing has in the sustainable development of
