Bioactive Proteins And Peptides As Functional Foods And Nutraceuticals:

Bioactive Proteins and Peptides as Functional Foods and Nutraceuticals Yoshinori Mine, Eunice Li-Chan, Bo Jiang, 2011-06-09 Bioactive Proteins and Peptides as Functional Foods and Nutraceuticals highlights recent developments of nutraceutical proteins and peptides for the promotion of human health The book considers fundamental concepts and structure activity relations for the major classes of nutraceutical proteins and peptides Coverage includes functional proteins and peptides from numerous sources including soy Pacific hake bovine muscle peas wheat fermented milk eggs casein fish collagen bovine lactoferrin and rice The international panel of experts from industry and academia also reviews current applications and future opportunities within the nutraceutical proteins and peptides sector *Bioactive Food Proteins and Peptides* Navam S. Hettiarachchy, Kenji Sato, Maurice R. Marshall, Arvind Kannan, 2011-12-02 Many naturally occurring compounds from foods such as rice vegetables fruits and animal products possess properties that help to slow disease progression inhibit pathophysiological mechanisms or suppress activities of pathogenic molecules Proteins and peptides play significant roles in such activities and are gaining importance as nutraceutic

Nutraceutical Proteins and Peptides in Health and Disease Yoshinori Mine, Fereidoon Shahidi, 2005-09-29 Reports of the beneficial health effects of some peptides have begun to make their way into the scientific literature Peptides can act as immunomodulators and have been shown to have a positive influence on calcium absorption and on regulation of serum cholesterol A number of peptides may also possess antimicrobial properties that enhance the b

Bioactive Peptides John Onuh, M. Selvamuthukumaran, Yashwant V Pathak, 2021-06-14 Bioactive peptides have been receiving attention recently due to their applications as health promoting agents Derived from food proteins and other natural sources they exhibit various beneficial effects such as preventing diseases or modulating physiological systems once absorbed As the market for nutraceuticals and functional foods continues to expand consumer interest has also grown and there are many common foods that have shown an abundance of bioactive peptides including dairy products cereal legumes meat and numerous other sources In this newest addition to the series Nutraceuticals Basic Research and Clinical Applications Bioactive Peptides Production Bioavailability Health Potential and Regulatory Issues provides a comprehensive review of the current state of knowledge in the field of food protein hydrolysates and bioactive peptides their food sources bioavailability production applications functionalities health potentials and regulatory issues governing their use Features Discusses different methodologies employed for scaling up bioactive peptides commercially Provides information on optimizing the production process Explains various bioactive properties exerted by different types of bioactive peptides Explores the application of metabolomics to the study of bioactive peptides With over 20 chapters written by established subject matter experts in their field this book provides timely information and discusses the latest developments of bioactive peptides It will be useful for researchers academics and industry experts and can serve as an excellent resource for anyone interested in enhancing their knowledge in the field of bioactive peptides **Functional**

Foods and Nutraceuticals Chukwuebuka Egbuna, Genevieve Dable Tupas, 2020-08-24 Functional foods and nutraceuticals are food products that naturally offer or have been modified to offer additional health benefits beyond basic nutrition. As such products have surged in popularity in recent years, it is crucial that researchers and manufacturers understand the concepts underpinning functional foods and the opportunity they represent to improve human health, reduce healthcare costs, and support economic development worldwide. *Functional Foods and Nutraceuticals: Bioactive Components, Formulations, and Innovations* presents a guide to functional foods from experienced professionals in key institutions around the world. The text provides background information on the health benefits, bioavailability, and safety measurements of functional foods and nutraceuticals. Subsequent chapters detail the bioactive components in functional foods responsible for these health benefits, as well as the different formulations of these products and recent innovations spurred by consumer demands. Authors emphasize product development for increased marketability, taking into account safety issues associated with functional food adulteration and solutions to be found in GMP adherence. Various food preservation methods aimed at enhancing the quality and shelf life of functional food are also highlighted. *Functional Foods and Nutraceuticals: Bioactive Components, Formulations, and Innovations* is the first of its kind, designed to be useful to students, teachers, nutritionists, food scientists, food technologists, and public health regulators alike.

Molecular Mechanisms of Action of Functional Foods and Nutraceuticals for Chronic Diseases Shima Abdollahi, Syam Mohan, Yashwant V. Pathak, 2023-04-19 There has been a global rise in the incidence of chronic illnesses, which may be partially attributed to the lengthening of the average human lifespan. Functional foods and nutraceuticals have a potential role to play in the development and maintenance of health. They can assist the body in its battle against inflammation and chronic illnesses. *Molecular Mechanisms of Action of Functional Foods and Nutraceuticals for Chronic Diseases* addresses the effects and mechanism of functional foods in relation to chronic diseases such as obesity, cardiovascular diseases, diabetes, cancer, etc. This volume, like the first volume *Applications of Functional Foods and Nutraceuticals for Chronic Diseases*, inspires new thought processes and a paradigm shift in research and development. Key Features: Discusses the molecular mechanism of action, the range of toxicities exerted by these food components for functional foods for addressing chronic conditions. Enhances scientists and industrial personnel knowledge of functional foods and in the management of chronic diseases. Presents research on the role of functional foods/nutraceuticals in preventing and treating chronic diseases through epigenetic modulation. Explores various subjects such as epigenetics, immunological, metabolic, technological, and neurodegenerative aspects affected by functional foods in chronic diseases. The world's leading wellness centers for chronic diseases are using functional foods and nutraceuticals in their practice and discovering their useful applications, and this second of two volume sets is another great reference for practitioners, scientists, and clinicians in the management of chronic diseases. Contributors hail from different geographical locations around the world and have many years of research and scholarly experience in functional foods, nutraceuticals, and biology.

Nutraceutical and Functional Food Processing Technology Joyce I. Boye, 2015-02-04 For several years the food industry has been interested in identifying components in foods which have health benefits to be used in the development of functional food and nutraceutical products. Examples of these ingredients include fibre, phytosterols, peptides, proteins, isoflavones, saponins, phytic acid, probiotics, prebiotics, and functional enzymes. Although much progress has been made in the identification, extraction, and characterisation of these ingredients, there remains a need for ready and near market platform technologies for processing these ingredients into marketable value added functional food and nutraceutical products. This book looks at how these ingredients can be effectively incorporated into food systems for market and provides practical guidelines on how challenges in specific food sectors such as health claims and marketing can be addressed during processing. *Nutraceutical and Functional Food Processing Technology* is a comprehensive overview of current and emerging trends in the formulation and manufacture of nutraceutical and functional food products. It highlights the distinctions between foods falling into the nutraceutical and functional food categories. Topics include sustainable and environmentally friendly approaches to the production of health foods, guidelines and regulations, and methods for assessing safety and quality of nutraceutical and functional food products. Specific applications of nutraceuticals in emulsion and salad dressing, food products, beverages, and soft drinks, baked goods, cereals, and extruded products, fermented food products, are covered, as are novel food proteins and peptides and methods for encapsulating nutraceutical ingredients and packaging. The impact of processing on the bioactivity of nutraceutical ingredients, allergen management, and the processing of allergen free foods, health claims, and nutraceutical food product commercialization are also discussed. *Nutraceutical and Functional Food Processing Technology* is a comprehensive source of practical approaches that can be used to innovate in the nutraceutical and health food sectors. Fully up to date and relevant across various food sectors, the book will benefit both academia and industry personnel working in the health food and food processing sectors.

Advances in Nutraceuticals and Functional Foods Sreerag Gopi, Preetha Balakrishnan, 2022-05-18 This book examines the rapidly growing field of functional foods in the prevention and management of chronic and infectious diseases. Chapters explore the varied sources, biochemical properties, metabolites, health benefits, and safety of bioactive ingredients of nutraceutical and functional food products. Special emphasis is given to linking the molecular and chemical structures of biologically active components in foods to their nutritional and pharmacological effects on human health and wellness. In addition to discussing scientific and clinical rationales for different sources of functional foods, the book also explains in detail scientific methodologies used to investigate the functionality, effectiveness, and safety of bioactive ingredients in food. The chapter authors discuss advanced nanocarriers for nutraceuticals based on structured lipids and nonlipid nanoparticulate approaches for improved nutrient bioavailability, adulteration, and safety issues, nanodelivery systems, microencapsulation, and more. The book discusses some particular health benefits from nutrition nutraceuticals including probiotic dairy and non dairy products and bioactive proteins and peptides as functional foods. The volume also

gives an overview of emerging trends growth patterns and new opportunities in the field of nutraceuticals and functional foods

Innovative Technologies in Beverage Processing Ingrid Aguilo-Aguayo, Lucia Plaza, 2017-05-18 An in depth look at new and emerging technologies for non alcoholic beverage manufacturing The non alcoholic beverage market is the fastest growing segment of the functional food industry worldwide Consistent with beverage consumption trends generally the demand among consumers of these products is for high nutrient drinks made from natural healthy ingredients free of synthetic preservatives and artificial flavor and color enhancers Such drinks require specialized knowledge of exotic ingredients novel processing techniques and various functional ingredients The latest addition to the critically acclaimed IFST Advances in Food Science series this book brings together edited contributions from internationally recognized experts in their fields who offer insights and analysis of the latest developments in non alcoholic beverage manufacture Topics covered include juices made from pome fruits citrus fruits prunus fruits vegetables exotic fruits berries juice blends and non alcoholic beverages including grain based beverages soups and functional beverages Waste and by products generated in juice and non alcoholic beverage sector are also addressed Offers fresh insight and analysis of the latest developments in non alcoholic beverage manufacture from leading international experts Covers all product segments of the non alcoholic beverage market including juices vegetable blends grain based drinks and alternative beverages Details novel thermal and non thermal technologies that ensure high quality nutrient retention while extending product shelf life Written with the full support of The Institute of Food Science and Technology IFST the leading qualifying body for food professionals in Europe Innovative Technologies in Beverage Processing is a valuable reference working resource for food scientists and engineers working in the non alcoholic beverage industry as well as academic researchers in industrial food processing and nutrition

Anti-Ageing Nutrients Deliminda Neves, 2015-04-22 Ageing is a complex time related biological phenomenon that is genetically determined and environmentally modulated According to even the most pessimistic projections average lifespan is expected to increase around the world during the next 20 years significantly raising the number of aged individuals But increasing life expectancy presents new problems and industrialized countries are facing a pronounced increase in lifestyle diseases which constitute barriers to healthy ageing Anti Ageing Nutrients Evidence based Prevention of Age Associated Diseases is written by a multi disciplinary group of researchers all interested in the nutritional modulation of ageing mechanisms Structured in three parts Part 1 looks at the cellular modifications that underlie senescence of cells and ageing of the organisms the effects of energy restriction on cellular and molecular mechanisms and in the whole organism and the epigenetic modifications associated with ageing Part 2 includes chapters which discuss the nutritional modulation of age associated pathologies and the functional decline of organs with a focus on those primarily affected by chronological ageing Part 3 summarises the knowledge presented in the previous chapters and considers the best diet pattern for the aged individuals The book reflects the most recent advances in anti ageing nutrition and will be a valuable resource for
