*Food Security and Development* Udaya Sekhar Nagothu, 2014-11-13 The global food system is characterized by large numbers of people experiencing food insecurity and hunger on the one hand and vast amounts of food waste and overconsumption on the other

This book brings together experiences from different countries addressing the challenges associated with food security. Seen through various disciplinary lenses, the different cases included are countries at various stages of food security with diverse stories of success as well as failures in their efforts. China, Brazil, and India, as well as less developed countries in Africa and Asia such as Malawi, Ethiopia, Tanzania, Myanmar, Bangladesh, and the Philippines. The authors pay special attention to the environmental and socio-economic challenges in the respective chapters and how they contribute to food insecurity. Each of the case studies identifies and analyzes which factors or drivers environmental, economic, policy, technology, markets have been the most powerful shapers of the food system and their future impact. The case studies identify interventions at regional, national, and local level that contribute positively to food security, highlighting solutions that are effective and easy to implement for all levels of decision makers from farmers to policy makers. Overall, the book provides insights in order to foster a greater understanding of the issues surrounding food security and support progress towards the goal of a sustainable food system for all.

**Biofuels, Bioenergy and Food Security** Deepayan Debnath, Suresh Chandra Babu, 2019-06-15. *Biofuels, Bioenergy and Food Security: Technology, Institutions and Policies* explores the popular Food versus Fuel debates, discussing the complex relationship between the biofuel and agricultural markets. From the importance of bioenergy in the context of climate change to the potentially positive environmental consequences of growing second generation biofuels, crops, this book provides important insights into the impact of policy, the technical implementation, and the resulting impact of biofuels. The discussion of existing issues hindering the growth of the cellulosic biofuel industry and their remedies are particularly relevant for policy makers and others associated with the biofuel industry. Transferring information on bioenergy economy through the discussion of the current and emerging biofuel market, country specific case studies explain the existing biofuel policy and its consequences to both the energy and agricultural markets. Economic simulation models explain the future of the bioenergy markets. *Biofuels, Bioenergy and Food Security: Technology, Institutions and Policies* is an invaluable resource to the students, scientific community, policy makers, and investors in the bioenergy industry. Students will benefit from a variety of perspectives on major societal questions in context of the interaction between food security and bioenergy. Its review of existing literature on the biofuel market, investment opportunities, and energy independence provides a broad overview to allow informed decision making regarding the industry. Provides an integrated overview of the world biofuel market by country, including a summary of the existing biofuel policies, role of investment opportunities, and rural development potential. Discusses the impact of biofuels on efforts by developing countries to become more energy self-sufficient. Examines the environmental consequences of biomass based biofuel use.

**Biofuels, Land Grabbing and Food Security in Africa** Atakilt Beyene, Prosper B. Matondi, Kjell Havnevik, 2011-06-09. The issue of biofuels has already been much debated, but the focus to date has largely been on Latin America and deforestation. This highly original work breaks fresh ground in looking at the African perspective. Most African governments see biofuels as having the potential

to increase agricultural productivity and export incomes and thus strengthen their national economies improving energy balances and rural employment At the same time climate change may be addressed through reduction of green house gas emissions There are however a number of uncertainties mounting that challenge this scenario Using cutting edge empirical case studies this knowledge gap is addressed in a variety of chapters examining the effects of large scale biofuel production on African agriculture In particular land grabbing and food security issues are scrutinised both of which have become vital topics in regard to the environmental and developmental governance of African countries A revealing book for anyone wishing to understand the startling impact of biofuels and land grabbing on Africa **Biofuels and Food Security** Tatsuji Koizumi, 2014-05-03 Examining the relationship between biofuels and food security this book presents an economic analysis of the competition between biofuels and food It covers the historical and current situation of biofuels and food security in Brazil China Japan USA EU Thailand India Indonesia Malaysia Philippines and other countries Furthermore it demonstrates that not only feedstock of agricultural product based biofuels but also cellulose based biofuels can compete with food related demand and agricultural resources The issue of whether this competition is good or bad for food security is explored and this topic is examined at global national sub national and household levels In order to deal with energy security to reduce greenhouse gas emissions and to strengthen agricultural rural development biofuel production and utilization is increasing all over the world One of the most crucial problems is the competition for resources between biofuel and food This biofuel and food security discussion is expected to continue into the future and this book proposes the action that is needed to deal with this issue on various levels Biofuel and Food Security provides a valuable resource to undergraduates and researchers of economics agricultural economics and renewable science and also policy makers involved in government or international organizations It will additionally be of interest to those employed in renewable energy and agriculture in an industrial capacity Routledge Handbook of Food and Nutrition Security Bill Pritchard, Rodomiro Ortiz, Meera Shekar, 2016-03-31 The concept of food and nutrition security has evolved and risen to the top of the international policy agenda over the last decade Yet it is a complex and multi faceted issue requiring a broad and inter disciplinary perspective for full understanding This Handbook represents the most comprehensive compilation of our current knowledge of food and nutrition security from a global perspective It is organized to reflect the wide scope of the contents its four sections corresponding to the accepted current definitional frameworks prevailing in the work of multilateral agencies and mainstream scholarship The first section addresses the struggles and progression of ideas and debates about the subject in recent years The other sections focus on three key themes how food has been is and should be made available including by improvements in agricultural productivity the ways in which politico economic and social arenas have shaped access to food and the effects of food and nutrition systems in addressing human health known as food utilisation Overall the volume synthesizes a vast field of information drawn from agriculture soil science climatology economics sociology human and physical geography the nutrition and health

sciences environmental science and development studies      *Climate Change and Food Security in South Asia* Rattan Lal, Mannava VK Sivakumar, S.M.A. Faiz, A.H.M. Mustafizur Rahman, Khandakar R. Islam, 2010-10-17 This book addresses an important topic of food security in South Asia with specific reference to climate change Of the 1 billion food insecure people in the world more than 30% are in South Asia The problem of food insecurity may be exacerbated by the projected climate change especially because of the water scarcity caused by rapid melting of the glaciers in the Himalayas and increase in variability in monsoonal rains and frequency of extreme events Furthermore large populations of Bangladesh and other coastal regions may be displaced by sea level rise Thus this volume addresses recommended land use and soil water crop vegetation management practices which would enable land managers to adapt to climate disruption by enhancing soil ecosystem social resilience In addition to biophysical factors this book also addresses the issues related to human dimensions including social ethnical and political considerations      **Potential Land Use Competition from First-generation Biofuel Expansion in Developing Countries** George C. Schoneveld, 2010-01-01      *Environmental Management of Energy from Biofuels and Biofeedstocks* James G. Speight, Kamel Singh, 2014-02-19 The most comprehensive and thorough volume on the environmental aspects of energy from biofuels and biofeedstocks Biomass is a renewable resource whose utilization has received great attention due to environmental considerations and the increasing demands of energy worldwide Since the energy crises of the 1970s many countries have become interested in biomass as a fuel source to expand the development of domestic and renewable energy sources reduce the environmental impacts of energy production provide rural prosperity for its poor farmers and bolster a flat agricultural sector This first volume in the Energy and the Environment series discusses the environmental impacts and social concerns of energy production in its various forms offering comprehensive coverage of the many available biofuels Starting with a historical overview Environmental Management of Energy from Biomass and Biofeedstocks Presents a full technological treatment of the processes engineering and applications of biofuels and biofeedstocks Describes the relevant technologies and their environmental impacts Covers the social aspects economic aspects and the future of biofuels Discusses a variety of biofuels and their possible use and applicability in different countries
