Power, Politics, and Universal Health Care Stuart Altman, 2011-09-27 Essential reading for every American who must navigate the US health care system Why was the Obama health plan so controversial and difficult to understand In this readable entertaining and substantive book Stuart Altman internationally recognized expert in health policy and adviser to five US presidents and fellow health care specialist David Shactman explain not only the Obama health plan but also many of the intriguing stories in the hundred year saga leading up to the landmark 2010 legislation Blending political intrigue policy substance and good old fashioned storytelling this is the first book to place the Obama health plan within a historical perspective The authors describe the sometimes haphazard piece by piece construction of the nation's health care system from the early efforts of Franklin Roosevelt and Harry Truman to the later additions of Ronald Reagan and George W Bush In each case they examine the factors that led to success or failure often by illuminating little known political maneuvers that brought about immense shifts in policy or thwarted herculean efforts at reform The authors look at key moments in health care history the Hill Burton Act in 1946 in which one determined poverty lawyer secured the rights of the uninsured poor to get hospital care the three layer cake strategy of powerful House Ways and Means Committee Chairman Wilbur Mills to enact Medicare and Medicaid under Lyndon Johnson in 1965 the odd story of how Medicare catastrophic insurance was passed by Ronald Reagan in 1988 and then repealed because of public anger in 1989 and the fact that the largest and most expensive expansion of Medicare was enacted by George W Bush in 2003 President Barack Obama is the protagonist in the climactic chapter learning from the successes and failures chronicled throughout the narrative The authors relate how in the midst of a worldwide financial meltdown Obama overcame seemingly impossible obstacles to accomplish what other presidents had tried and failed to achieve for nearly one hundred years

Power,

Politics and the Fragmentation of Evangelicalism Kenneth J. Collins, 2012-08-02 Kenneth J Collins traces the establishment of the evangelical enterprise in American culture and its influences on the political and social values of the American landscape throughout the twentieth century as well as its fragmentation into competing ideological camps **Power, Politics, and Organizational Change** David Buchanan, Richard Badham, 2008-02-19 Many books on management are sanitized cleanly technical accounts of the unreality of managerial life and work Politics hardly feature This book tells it like it is it dishes the dirt gets low down into the funky and fascinating politics of organizational life Stewart Clegg Aston Business School and University of Technology Sydney Combining a practical and theoretical guide to the politics of organizational change this book provides an exceptional resource to students of change management and organizational behaviour Buchanan and Badham show how the change agent who is not politically skilled will fail and that it is necessary to be able and willing to intervene in the political processes of the organization This revised edition includes a range of excellent new material and features including a new chapter on gender in approaches to organization politics a full range of teaching materials including case studies incident reports self assessments and more Each chapter recommends a feature film or DVD to illustrate aspects of organization politics fresh research evidence recent literature on the nature of entrepreneurial politics a model of political expertise and how that can be developed This lively and engaging book is key to MBA and other Masters degree candidates taking courses in change management and organizational behaviour It will also be valuable for practising managers on tailored executive programmes in organization politics Geo-economics and Power Politics in the 21st Century Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06 Starting from the key concept of geo economics this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran s nuclear programme or Russia s annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the economic binds that are decisive in today s globalised and highly interconnected world Indeed as the volume shows the ability to wield economic power forms an essential means in the foreign policies of major powers In so doing the book challenges simplistic accounts of a return to traditional military driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations As such it advances our understanding of geo economics as a strategic practice and as an innovative and timely analytical approach This book will be

of much interest to students of security studies international political economy foreign policy and International Relations in general **Power, Perception, and Politics in the Making of Iranian Grand Strategy** Kevjn Lim, 2022-07-04 This book explains changes to Iranian grand strategy over the past four decades and it does so by advancing a multicausal model that unifies the three main paradigms of International Relations IR theory Hence ideas constructivism mediate between the structure of material capabilities realism and agents liberalism and interact with each to produce respectively threat perception and political preferences Using these two explanatory factors the author demonstrates how the Islamic Republic s grand strategy has systematically varied over time to produce a mix of outcomes that includes balancing expansionism bandwagoning appeasement engagement and retrenchment Beyond its theoretical contribution this book is policy relevant in that it explains and predicts the external conduct of what is arguably the Middle East s most consequential actor with implications reverberating far beyond the region Academic in conception and rigor the book is intended not only for specialists and practitioners but appeals to the lay reader interested in the broader Middle East West Asia the region s relationship with major powers and regional conflict dynamics
