STRENGTHEN AND IMPROVE THEM AND THE INSTITUTIONS THAT PARTNER WITH THEM YOU SHOULD READ IT

School partnerships have a long history in the United States The inception of public schooling was a type of partnership with the community The concept of local school boards and local control was integral to the establishment of schools and the idea that public education was a public good has deep roots in the country Partnerships denote relationships which are mutually beneficial to the parties involved and which result in joint benefits for those who create and engage in them The partnerships presented in this book provide ample evidence of the value and benefits of these arrangements The book contains stories and research about school partnerships from a variety of groups and perspectives which are focused upon multiple issues within educational institutions and communities within the United States The final chapter presents an analysis across all the partnerships to identify the elements that fostered and hindered their success and the primary lessons learned This analysis should provide meaningful information for those engaged in developing and operating similar partnerships or those involved in conducting research on or about them Although the cases presented in this book occur within the United States the findings may also have relevance for similar initiatives in other countries Praise for Creating School Partnerships that Work A Guide for Practice and Research Kudos to Dana Griggs and Frances Kochan for compiling the rich accountings of eight different school partnerships all in one place Readers will learn a great deal from both the individual accountings of a broad array of partnerships as well as the collective analysis of the partnerships and lessons learned across them Creating School Partnerships that Work A Guide for Research and Practice is a must read book for anyone who ever has been is or desires to be involved in any type of school partnership Nancy Fichtman Dana Professor School of Teaching and Learning University of Florida Gainesville Creating School Partnerships that Work A Guide for Research and Practice is a must read for scholars researchers practitioners and community members seeking to identify elements of successful school partnerships that foster students academic and personal successes This edited volume shares stakeholders perspectives on multi dimensional school partnerships which have successfully led to sustained collaborations across diverse purposes that are mutually beneficial for all groups The usefulness of the content analysis presented in the final chapter which identifies elements both fostering and hindering partnerships with recommendations cannot be overstated Mary Barbara Trube Professor Emerita Ohio University Chillicothe Contributing Faculty Dissertation Mentor Walden University Early Childhood Education Adjunct Faculty Florida SouthWestern State College Mentor Early Childhood Consultant ILEAD Xi an Jiaotong Liverpool University Expanding Waistlines David Campos, 2007-01-01 Many health experts agree that childhood obesity is an epidemic in the modern world In the United States alone government data suggest that the number of overweight or obese children is nearly triple the number of 1980 and there are no signs that this incidence is decreasing Information like this cannot be ignored or trivialized because excess weight can prove damaging to general wellness Indeed overweight or obese children and youth risk a wide range of medical complications Extra pounds can also negatively impact their well being which can cause long term mental

health problems In short if the childhood obesity crisis is left forsaken an unprecedented generation of youth will have a diminished quality of life Expanding Waistlines is ideal for child advocates and youth serving professionals who seek to learn more about childhood obesity A prominent feature of Expanding Waistlines is that each chapter poses a series of questions relevant to school personnel such as What can I do at my school and in my classroom How should I approach my students who are overweight or obese What are some key elements I should look for when evaluating a potential program Specifically the book explores the factors that contribute to obesity in society and the associated risks of excess weight on children and youth Subsequent chapters discuss how to promote healthy eating practices and regular physical activity at school and home The final chapters report on specific resources Expanding Waistlines also features the latest demographic data BMI calculations and classifications recommended guidelines for health Wellness Policy requirements and food label information
