**A Realistic Universe** John Elof Boodin, 1916 A Realistic Universe An Intro To Metaphysics by John Elof Boodin first published in 1916 is a rare manuscript the original residing in one of the great libraries of the world This book is a reproduction of that original which has been scanned and cleaned by state of the art publishing tools for better readability and enhanced appreciation Restoration Editors mission is to bring long out of print manuscripts back to life Some smudges annotations or unclear text may still exist due to permanent damage to the original work We believe the literary significance of the text justifies offering this reproduction allowing a new generation to appreciate it A Realistic Universe Boodin Elof, 2013-06 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy REALISTIC UNIVERSE JOHN ELOF. BOODIN, 2018 **A Realistic Universe** John Elof Boodin, 2015-06-16 Excerpt from A Realistic Universe An Introduction to Metaphysics This volume on metaphysics is the sequel of a volume on the theory of knowledge entitled Truth and Reality which was published in 1911 The two volumes furnish a survey of the field of general philosophy from the point of view of pragmatic realism This attitude which the author has been championing for several years is an attempt to apply scientific method to philosophic problems The term pragmatic is used in the sense which was first advocated by C S Peirce and which is defined by the author in his own terms in Truth and Reality As applied to metaphysics the pragmatic method means that we must judge the nature of reality in its various grades and complexities by the consequences to the realization of human purposes instead of by a priori assumptions Some may prefer the older adjectives of empirical or critical but these terms seem definitely associated with certain historical doctrines and a new term seems to be preferable in designating the scientific tendency of to day There is need in every age of retranslating the perennial problems of philosophy into terms of living human interest and the author hopes in a measure to further this movement at the present time through these volumes In A Realistic Universe the author has tried to make vital the fundamental problems of metaphysics in terms of our present thought world without the cant of the past but with a deep sense of indebtedness to the masters of all time While the book is intended primarily for the philosophic student the aim has been to make the style as clear and simple as the problems would permit In the use of scientific material an effort has been made to find sources which would be intelligible to the layman rather than to make an appearance of erudition Some portions such as the introductory chapter and part five on Form may be of special interest to the general reader About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the

*Books of 1912- ,1922* **The Salesianum**, 1916 *The Ecclesiastical Review*, 1917 *The Flesh of Being* David Ross, 2008-12-18 The text is a conversation between the author and himself mediated by the text of Friedrich Nietzsche s *Thus Spoke Zarathustra* The text is a pre text a reading both before and after that frames the art work What is that Let us say in the spirit of inquiry that of knowing thyself What then of this strange hyphenation The present text is a pre text because it is before the Text the text which the author is always writing but which manifests itself in sporadic impulsive bursts in the form of actual works The book is the pre text because it is an excuse a rationale a piece of pretension The book is not about Nietzsche but what it is for someone to read Nietzsche s text a book for everyone and no one How then does one read a book meant for oneself if oneself is everyone and not at all for oneself if oneself is none Or is it that the real task of reading is for the reader to read what reading is Then again need one distinguish between book and text Perhaps it is impossible to read a book such as *Thus Spoke Zarathustra* without invoking the text or even sub text that continually slips away If one can read a book one cannot the text for this reason the text is what the reader has to write through the reading This has been my experience with Nietzsche s text an experience I share with my readers The very possibility of reading invokes the need to re write the text Only in the space between reading and writing can the reader re writer hope to stand and understand the discursive grounds Is that the play

which this couplet performs There does not the reader enters upon the playground Read then and play The author s thanks go to Mr Andrew Fuyarchuk for the fine editing job that he did His contribution allowed further clarifications of the argument
