Children, Childhood, and the Future Andrea Kleeberg-Niepage, 2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives *Multilingual classroom contexts* Christa van der Walt, Verbra Pfeiffer, 2021-12-01 By far the majority of South African students get their schooling in a second language which means that our classrooms are multilingual This state of affairs is not exclusive to our country as can be seen in the many academic conferences on multilingual learning and teaching Terms like translanguaging and biliteracy appear in many articles and books that discuss the role language in education What makes the multilingual nature of our South African classrooms challenging is the fact that many learners switch from one language of learning and teaching to another at various points in their school career from home language to English or Afrikaans after the foundation phase from one language of learning and teaching to another when they move to new schools high school or tertiary institutions This book is an attempt to highlight the transitions from home to school from foundation to intermediate phase from primary to high

school and from high school to tertiary institutions **Knowledge, Normativity and Power in Academia** Aisha-Nusrat Ahmad, Maik Fielitz, Johanna Leinius, Gianna Magdalena Schlichte, 2018-02-15 Despite its capacity to produce knowledge that can directly influence policy and affect social change academia is still often viewed as a stereotypical ivory tower detached from the tumult of daily life Knowledge Normativity and Power in Academia argues that in our current moment of historic global unrest the fruits of the academy need to be examined more closely than ever This collection pinpoints the connections among researchers activists and artists arguing that despite what we might think the knowledge produced in universities and the processes that ignite social transformation are inextricably intertwined Knowledge Normativity and Power in Academia provides analysis from both inside and outside the academy to show how this seemingly staid locale can still provide space for critique and resistance Decolonizing Childhoods Liebel, Manfred, 2020-05-06 European colonization of other continents has had far reaching and lasting consequences for the construction of childhoods and children s lives throughout the world Liebel presents critical postcolonial and decolonial thought currents along with international case studies from countries in Africa Latin America and former British settler colonies to examine the complex and multiple ways that children throughout the Global South continue to live with the legacy of colonialism Building on the work of Cannella and Viruru he explores how these children are affected by unequal power relations paternalistic policies and violence by state and non state actors before showing how we can work to ensure that children s rights are better promoted and protected globally
