Biodiversity Of Polar Regions:

Biodiversity of Polar Regions Greg Pyers, 2010 Biodiversity is the variety of living things in a particular place within an ecosystem or across the entire Earth Biodiversity is important because it enables all kinds of plants and animals to survive and thrive It also keeps the world beautiful But human activities can threaten biodiversity Scientists estimate that as many as fifty species become extinct every day polar regions often have temperatures below 32 F 0 C and the plants and animals that live there have adapted to survive in these conditions polar biodiversity is threatened by overfishing whaling pollution tourism and climate change the Arctic ice cap is the largest ice cap in the world and global warming is the greatest threat to its biodiversity Book jacket **The Routledge Handbook of the Polar Regions** Mark Nuttall, Torben R

Christensen, Martin Siegert, 2018-07-18 The Routledge Handbook of the Polar Regions is an authoritative guide to the Arctic and the Antarctic through an exploration of key areas of research in the physical and natural sciences and the social sciences and humanities It presents 38 new and original contributions from leading figures and voices in polar research policy and practice as well as work from emerging scholars This handbook aims to approach and understand the Polar Regions as places that are at the forefront of global conversations about some of the most pressing contemporary issues and research questions of our age The volume provides a discussion of the similarities and differences between the two regions to help deepen understanding and knowledge Major themes and issues are integrated in the comprehensive introduction chapter by the editors who are top researchers in their respective fields The contributions show how polar researchers engage with contemporary debates and use interdisciplinary and multidisciplinary approaches to address new developments as well as map out exciting trajectories for future work in the Arctic and the Antarctic The handbook provides an easy access to key items of scholarly literature and material otherwise inaccessible or scattered throughout a variety of specialist journals and books A unique one stop research resource for researchers and policymakers with an interest in the Arctic and Antarctic it is also a comprehensive reference work for graduate and advanced undergraduate students **The Law of the Sea and the**

Polar Regions Erik J. Molenaar, Alex G. Oude Elferink, Donald R. Rothwell, 2013-08-15 The Law of the Sea and the Polar Regions Interactions between Global and Regional Regimes analyzes of the contemporary law of the sea and related areas of international law in Antarctica and the Arctic with a particular focus upon the interaction of global and regional regimes The global component of the international law of the sea principally the United Nations Convention on the Law of the Sea applies to the entire marine domain in both polar regions but explicitly requires regional implementation or acknowledges its usefulness This volume critically examines regional regimes for the Arctic and Antarctic on science maritime security fisheries and shipping by means of common research questions thus enabling an overall synthesis and identification of trends differences and similarities **Fungi in Polar Regions** Masaharu Tsuji, Tamotsu Hoshino, 2019-04-23 Fungi that inhabit polar region can grow and decompose organic compounds under subzero temperatures play important roles in the nutrient

cycle of polar region ecosystems Thus changes in the mycoflora affect the ecological recycling in these regions and understanding the cold adaptation strategies of fungi under extreme environments is critical for a better understanding of polar region ecosystems Due to their ability to survive under extreme environments fungi in polar region are seen to show potential for utilization in biotechnologies This book presents our current understanding of the mycoflora in polar region and their cold adaptation strategies and applied studies using their abilities Wilderness Protection in Polar Regions Antje Neumann,2020-04-14 Antarctica's wilderness values even though specifically recognized by the Environmental Protocol to the Antarctic Treaty are rarely considered in practice This deficiency is especially apparent with regard to a more and more increasing human footprint caused among others by a growing number of tourists visiting the region and conducting a broad variety of activities On the basis of a detailed study of three Arctic wilderness areas the Hammastunturi Wilderness Reserve Finland the Archipelago of Svalbard Norway and the Denali National Park and Preserve Alaska United States as well as the relevant policies and legislation in these countries Antje Neumann identifies numerous lessons learnt that can serve as suggestions for improving the protection of wilderness in Antarctica **Critical Geopolitics of the Polar Regions**

Dorothea Wehrmann,2018-11-13 Focusing on both Polar Regions this book provides a comprehensive understanding of political processes related to the rapidly changing Arctic and Antarctic where the environmental impacts of human activities are extremely visible Environmental changes in the Arctic and the Antarctic are increasingly seen as barometers of the global impact of human activities while newly arising economic opportunities in both Polar Regions prompt predictions that they will be the site of future conflicts This book maps and analyses the different actors involved in the politics of the Polar Regions to explain why similar patterns of interpretation of such major issues have become dominant in practical popular and formal geopolitical discourses Disentangling the politics the author illustrates how the ordering principles have evolved explains recent dynamics in political processes and provides the groundwork needed to better forecast future trends By focusing on the Americas the only continent that borders both Polar Regions the author shows how geographic proximity inspires interaction and cooperation among state and non state actors in very different ways This volume will be of interest to scholars and students of political science political geography international relations global governance and cultural studies It will have an international appeal particularly in the Americas and other countries with growing interests in the Polar Regions

Cruise Tourism in Polar Regions Michael Luck,Patrick T. Maher,Emma J. Stewart,2010-09-23 Cruises are the primary form of tourism in the Polar Regions and cruise ship tourism in both the Arctic and Antarctic is expanding rapidly The industry has moved beyond its infancy and is now entering a maturing phase with increased numbers and types of vessels more demanding routes and more regular and predictable patterns of activity The increase in cruise activities and the associated risks of accidents as well as the potential and actual impacts of the large numbers of tourists in the polar regions bring with it management challenges for sustainable use of these regions This book discusses critically the issues around

environmental and social sustainability of the cruise industry in Polar Regions Authors from Canada USA Europe Australia and New Zealand are experts in their respective fields and take an innovative critical and at times controversial approach to the subject , *Protecting Arctic Biodiversity* ,2010 The Arctic region is characterized by some of the largest continuous intact ecosystems on the planet but is facing increasingly larger threats These threats include the full range of stressors known from other parts of the world namely habitat loss and fragmentation from infrastructure and industrial development chemical pollution overharvesting climate change and invasive species infestations Many of these pressures are mainly globally driven including climate change long range transported pollution and even invasive species infestations Others such as harvesting and fragmentation are directly under Arctic governance though often driven from demands outside of the Arctic region This report takes a broad view of existing multilateral environmental agreements MEAs and examines the role of the global environment in impacting and influencing the efficiency of Arctic MEAs in protecting biodiversity and in sustainable development The report allows governing and scientific bodies of MEAs as well as national decision makers to better direct their programmes of work and other activities to address the needs of Arctic biodiversity and the region s local and Indigenous Peoples From publisher website *Polar Lakes and Rivers* Warwick F. Vincent,Johanna Laybourn-Parry,2008-09-11 This book provides an overview of the ecology of high latitude lakes rivers and glacial environments in both the North and South polar regions It describes each ecosystem type the remarkable aquatic life that thrives in these extreme habitats and the similarities and differences between Arctic and Antarctic waters
