Good Hygiene Practices and Their Prevention of Biofilms in the Food Industry Roy Fink, 2019-07-12 This book highlights the importance of hygiene in the food industry with regard to biofilms, which can be found on the contact materials of various food production facilities, including bakery, brewing, seafood processing, and dairy and meat processing. Good hygiene practices in such facilities can prevent microbial niches and harbourage sites, facilitate cleaning and disinfection, maintain or increase product shelf life, and improve food safety. This book provides essential information on the updated information on biofilm growth conditions, detection methods, and prevention and control strategies.

Oral Biofilms and Modern Dental Materials Andrei Cristian Ionescu, Sebastian Hahnel, 2021-04-01 This book provides an up-to-date perspective on oral biofilms and dental materials, equipping readers with a sound understanding of their mutual interactions. Experts from across the world comprehensively describe the main strategies that can be followed when designing modern bioactive and biomimetic dental materials, bearing in mind the goal of reducing the occurrence of pathological conditions such as secondary caries and peri-implantitis. The background to the book is the rapid expansion in the use of nanotechnologies and modern techniques to achieve levels of performance of dental materials that were unthinkable even a few years ago. Whereas conventionally dental materials have been regarded as inert, an important

paradigm shift is underway now these materials are being conceived as bioactive and biomimetic Modern dental materials can produce a response by interacting positively both with the host and with the biofilm permanently colonizing hard and soft tissues of the oral cavity These materials increasingly mimic the behavior of the tissues that they are replacing In documenting the latest knowledge in the field this book will be of value for both scientists in the fields of nanotechnology biofilms and dental materials and interested clinicians
