| Breathing Rate (breaths/minute) | Temperature (°C) |
|---------------------------------|------------------|
| 19                              | 5                |

**Breathing rate increases**
- d. Identify at least 3 control variables in this experiment.  
**Same tank, same fish, same pH of water, same time of day**
- e. What do you think would happen if you raised the temperature even more? Why would it be a bad idea to do this?  
**The breathing rate would increase even more, but if the temperature gets too hot the fish could die.**
