*Looking through the Speculum* Judith A. Houck, 2024-01-19 Highlights local history to tell a national story about the evolution of the women's health movement illuminating the struggles and successes of bringing feminist dreams into clinical spaces The women's health movement in the United States beginning in 1969 and taking hold in the 1970s was a broad based movement seeking to increase women's bodily knowledge reproductive control and well being It was a political movement that insisted that bodily autonomy provided the key to women's liberation It was also an institution building movement that sought to transform women's relationships with medicine it was dedicated to increasing women's access to affordable health care without the barriers of homophobia racism and sexism But the movement did not only focus on women's bodies It also encouraged activists to reimagine their relationships with one another to develop their relationships in the name of personal and political change and eventually to discover and confront the limitations of the bonds of womanhood This book examines historically the emergence development travails and triumphs of the women's health movement in the United States By bringing medical history and the history of women's bodies into our emerging understandings of second wave feminism the author sheds light on the understudied efforts to shape health care and reproductive control beyond the hospital and the doctor's office in the home the women's center the church basement the bookshop and the clinic Lesbians straight women and women of color all play crucial roles in this history At its center are the politics institutions and relationships created by and within the women's health movement depicted primarily from the perspective of the activists who shaped its priorities fought its battles and grappled with its shortcomings

*The New Yugoslav Woman* Branka Bogdan, 2025-09-30 From 1945 to 1989 the Yugoslav state connected its claims of progressive politics and gender equality to its support of free healthcare sex education and contraception and laws that supported reproductive choice Yugoslav men and women internalized these messages proclaiming their homeland's superior care for its citizens in comparison to postwar

Europe and the United States Even as Yugoslav women faced stigma and abuse for their usage of contraceptives and medical practitioners grappled with new regulations and technology alongside personal ideologies Yugoslavs celebrated their own reformation into new politically minded citizens who carefully navigated tradition and modernity as they reconstructed the nation The New Yugoslav Woman provides a social and cultural history of how Yugoslav communists used reproductive regulation to build a platform of socialism through self management and to position the country as a conduit between the global North and South Author Branka Bogdan traces reproduction as a central facet of socialist Yugoslavia's state formation through the nation's laws medical infrastructure technological growth and state run sex education programs Bringing this history to the present day with a discussion of more than two dozen interviews with Yugoslav patients and medical professionals Bogdan reveals how these recollections show key continuities with the past rather than an abrupt break between the socialist and post socialist worlds Drawing Yugoslavian women's experiences into the geopolitical history of reproduction and the Cold War era state The New Yugoslav Woman reveals the centrality of reproduction contraception and abortion to socialist Yugoslavia's self conception as the developed leader of the developing world
